1.Introduction to Brands and Logos

The module **Brands and Logos** provides your store with a new feature - an opportunity to attach the supplier and manufacturer to your product.

Brands and Logos module is really necessary for the stores, which have a number of different brands or suppliers.

Key features:

- Upload, configure and display product manufacturer brand on product and catalog page.
- Upload configure and display product supplier on product and catalog page.

Overall information:

Prestashop Brands and Logos Module increases the functionality of your store by allowing the customers to sort the products by brand.

In addition you can edit manufacturer and supplier respective pages.

Apply newly created brands to any existing products. Product brands pictures are displayed in the catalog as well as on the product page.

With **Prestashop Brands and Logos** module it will be much easier to browse through a store filled with various manufacturers and suppliers.

2. How to Install

1.Set 777 or 0777 on the folders: '/modules/' Important! Change all permissions back after installation.

2.Copy the brandsandlogos module to modules folder.

3.Back Office > Modules > Administration and install.

How to Deactivate

Back Office > Modules > Administration and Uninstall.

That's all! Enjoy the Brands and Logos performance.

3. How to Configure

Log in to the admin panel, and we will show all you may want to configure.

To view the extension settings, go to Modules -> Other Modules ->Brands and Logos

->Configure.

Backend setup is pretty self-explanatory.
