1. Introduction to Facebook and Twitter Connect

Are your customers tired of completing numerous forms for successful logins and remembering these data afterwards? This extension will connect your store to Facebook and Twitter and provide it with two biggest social networks advantages.

Your sales can grow together with Facebook and Twitter! This is a good reason to be friends with these social networks via **Prestashop Facebook and Twitter Connect**. The extension allows your store to connect to Twitter and Facebook and enjoy its all opportunities.

Key features:

- Twitter login
- Facebook login

Customers will see buttons on the top of the homepage or on checkout page to login with their Facebook or Twitter accounts. These fields and buttons won't be displayed for already logged in customers.

Using **Facebook and Twitter Connect** extension, you will keep up with customers' preferences and continue advertising your store.

2. How to Install

1.Set 777 or 0777 on the folders: '/modules/xxxbelvgmodule/'

Important! Change all permissions back after installation.

2.**Back Office > Preferences >Performance** - enable the Force compile.

3.Copy the xxxbelvgmodule module to modules folder.

4.**Back Office > Modules > Other Modules** and install.

How to Deactivate

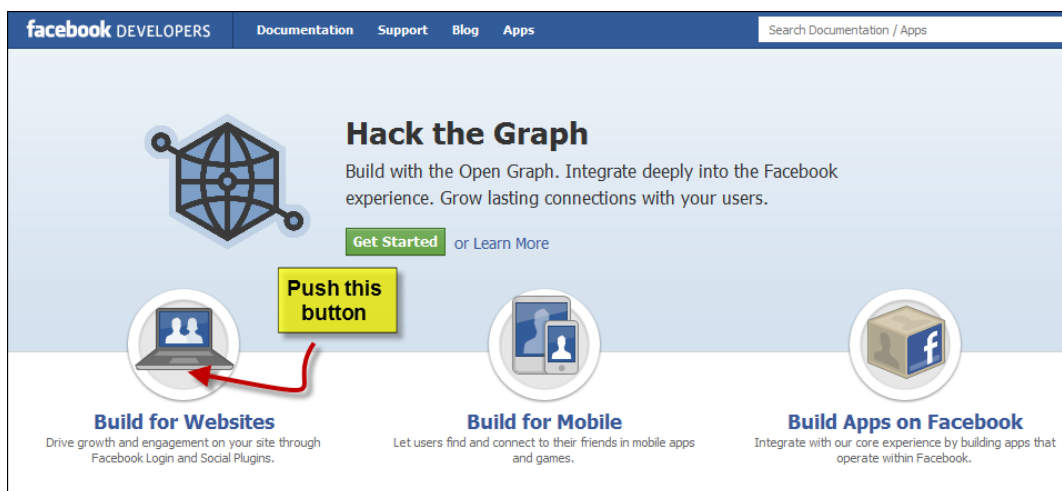

Office > Preferences >Performance - enable the Force compile.

Back Office > Modules > Other Modules and uninsall.

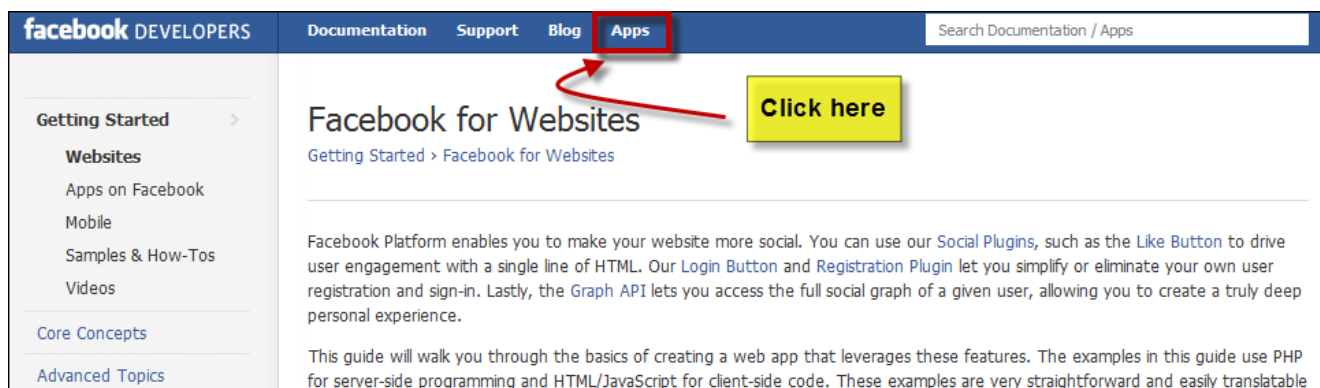

That's all! Enjoy the **Facebook and Twitter Connect** performance.

3. How to Create Facebook App

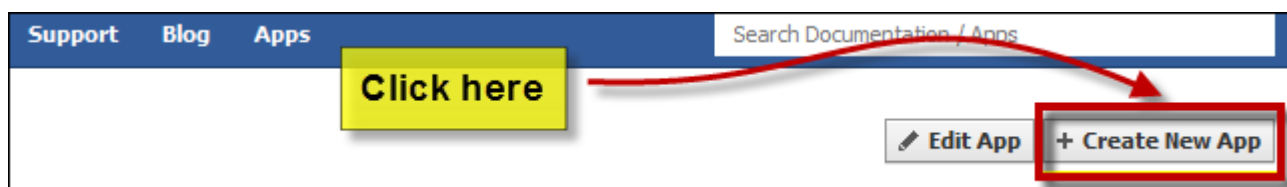

To create a Facebook app you need to go to the <http://developers.facebook.com/> and choose **Build for websites** option (on the left side).

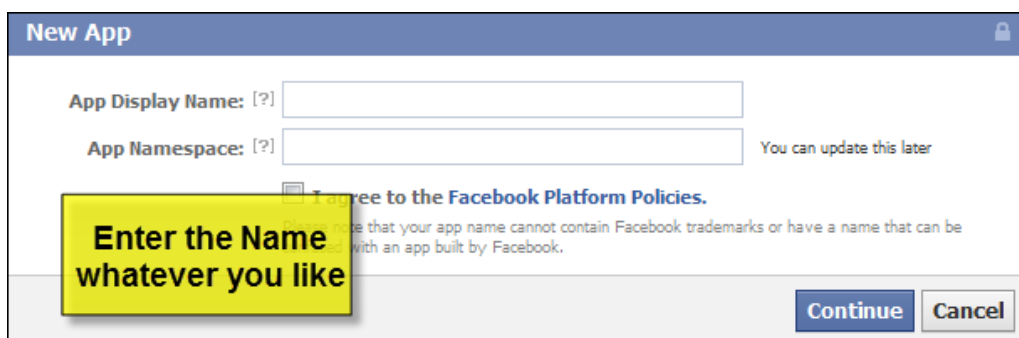

Then choose the **Apps** tab.

Press the **+Create new App** button.

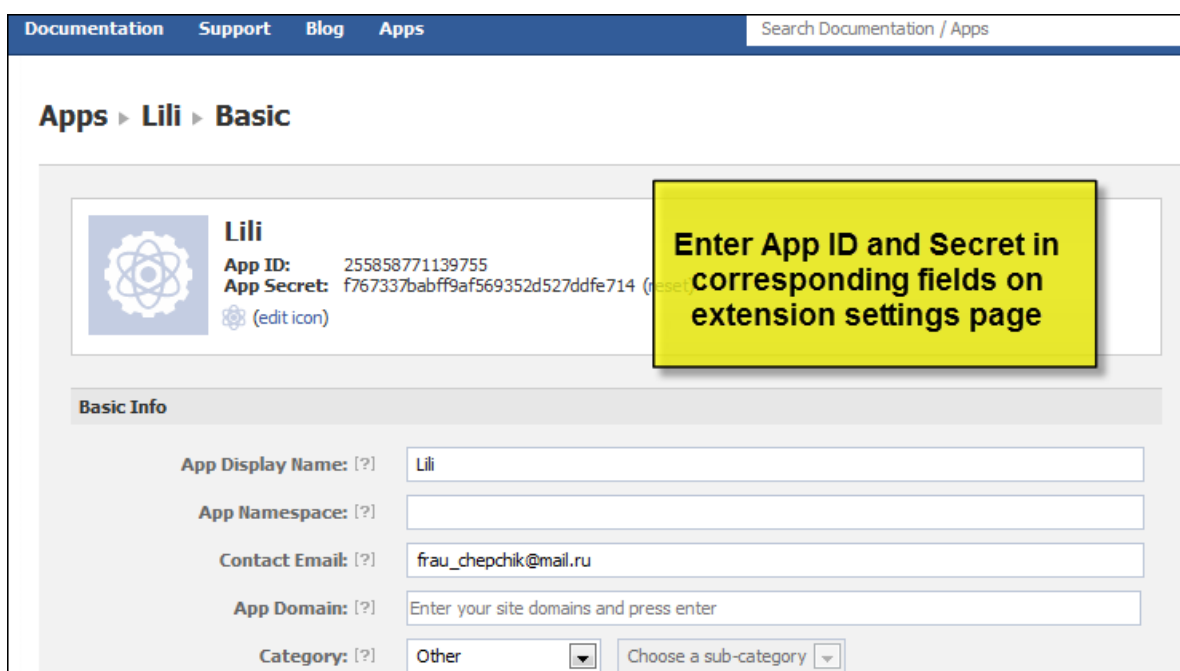

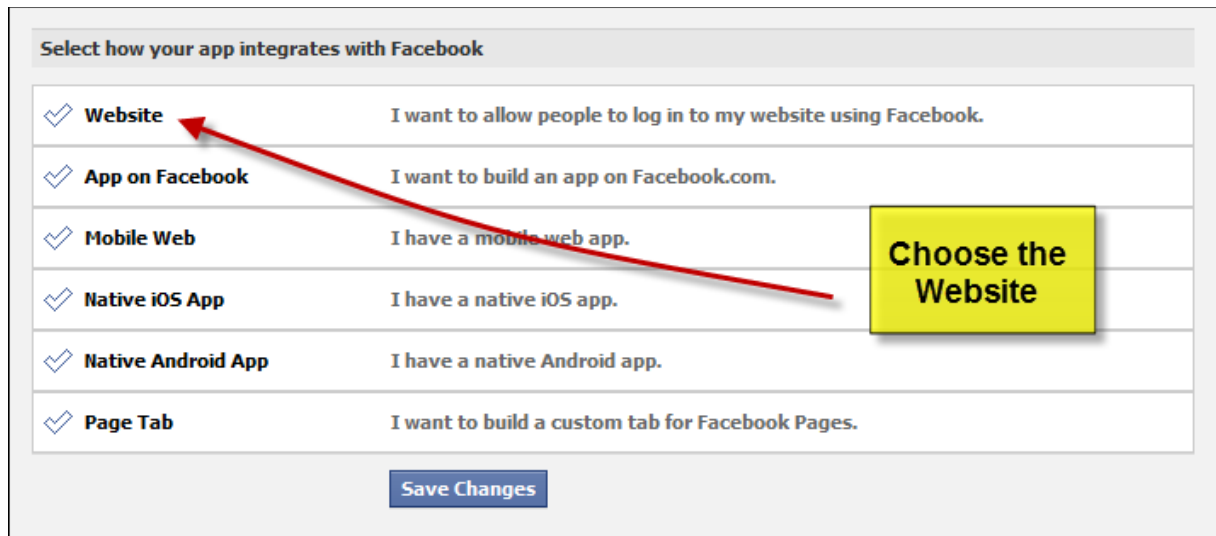

Name your app and push the **Continue** button.

The next step is the Captcha confirmation.

Type the site address in the **Site URL** field. Remember the following **Application ID** and **Application Secret** to enter them in corresponding fields on extension settings page.

Select how your app integrates with Facebook

<input checked="" type="checkbox"/> Website	I want to allow people to log in to my website using Facebook.
<input checked="" type="checkbox"/> App on Facebook	I want to build an app on Facebook.com.
<input checked="" type="checkbox"/> Mobile Web	I have a mobile web app.
<input checked="" type="checkbox"/> Native iOS App	I have a native iOS app.
<input checked="" type="checkbox"/> Native Android App	I have a native Android app.
<input checked="" type="checkbox"/> Page Tab	I want to build a custom tab for Facebook Pages.

Save Changes

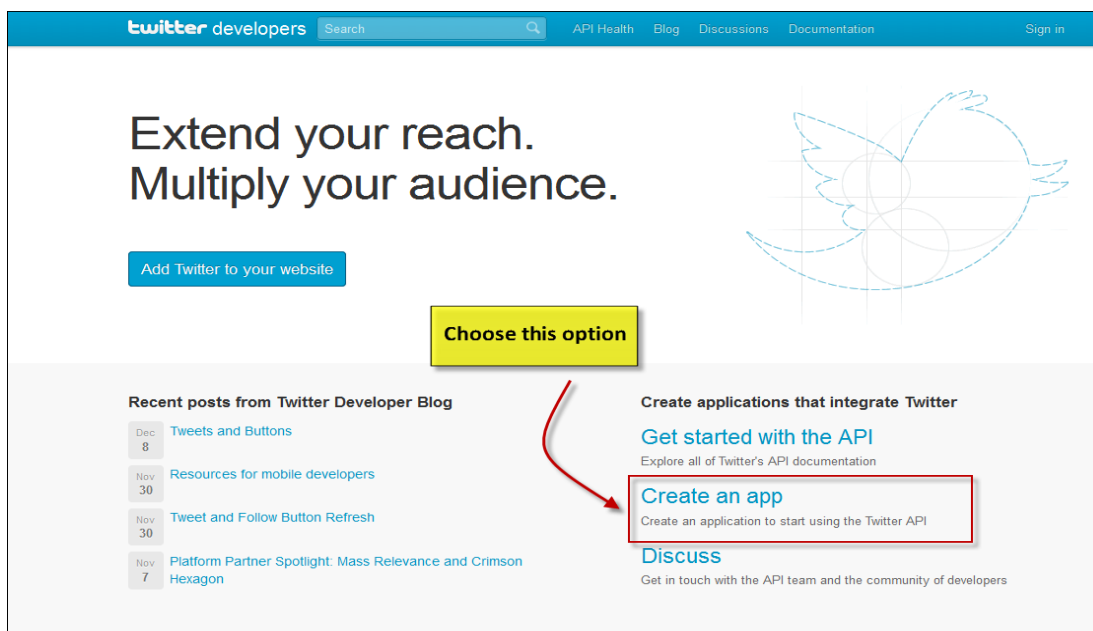

Choose the Website

Enter all the data and Save changes.

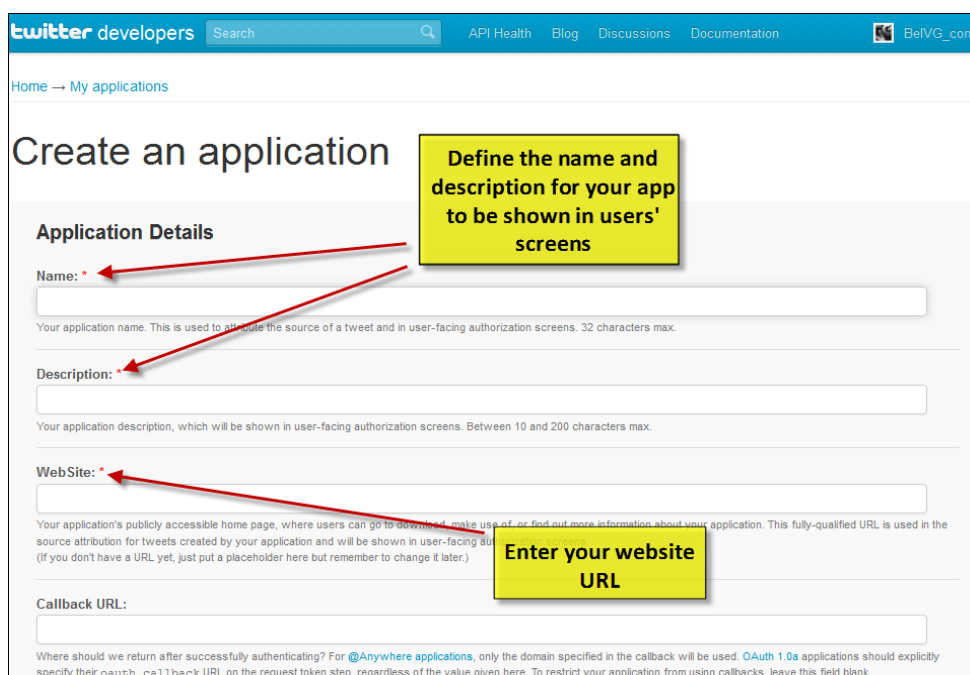

Now your Facebook App is created. Congratulations!

4. How to Create Twitter App

To create a Twitter app you need to go to the <https://dev.twitter.com/> and choose **Create an app** option (on the right side).

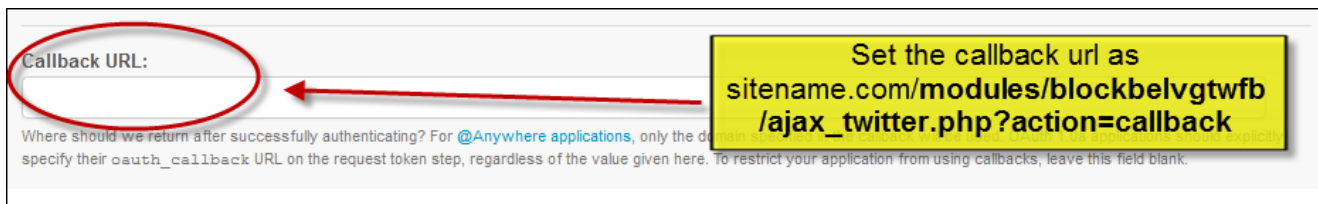

Then sign in with your Twitter account.

IMPORTANT!

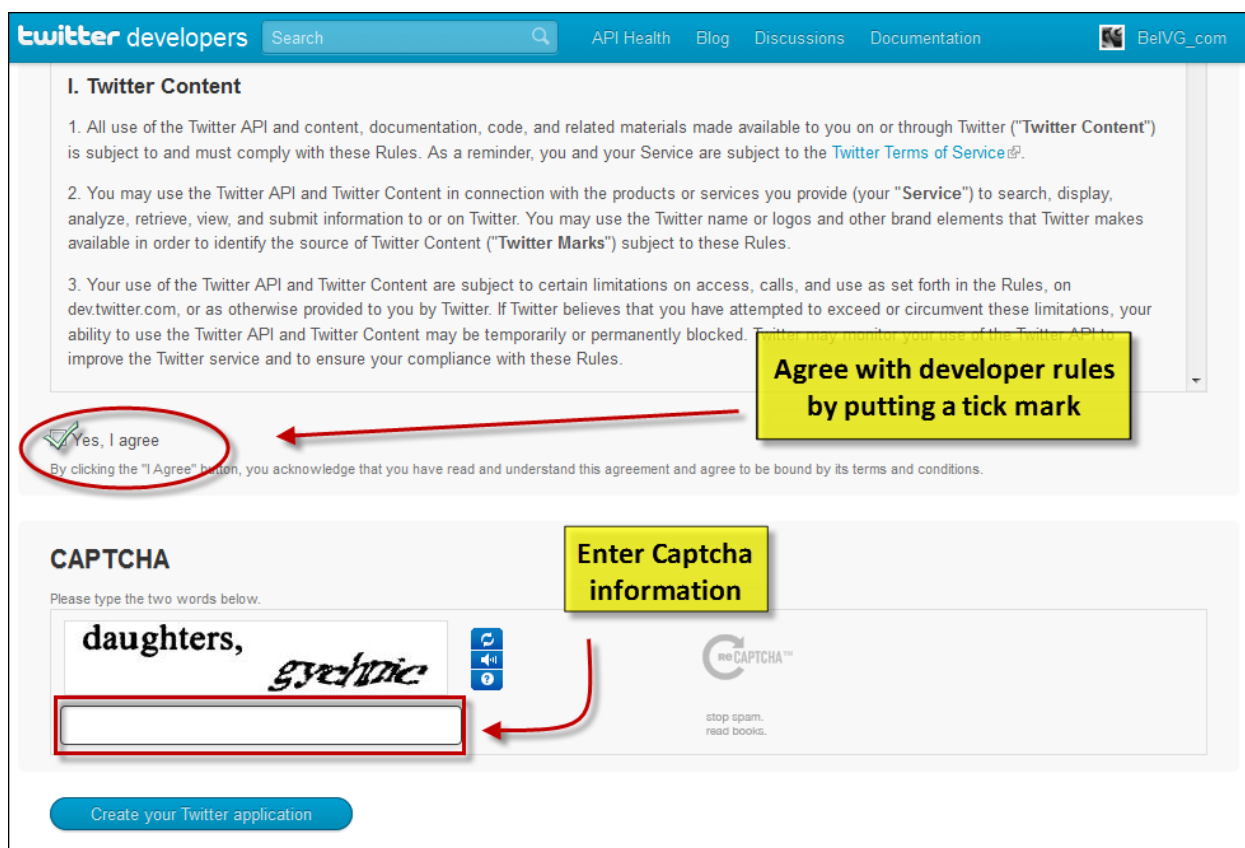

You have to set the callback URL as

`sitename.com/modules/blockbelvgtwfb/ajax_twitter.php?action=callback`. Other way it won't work!

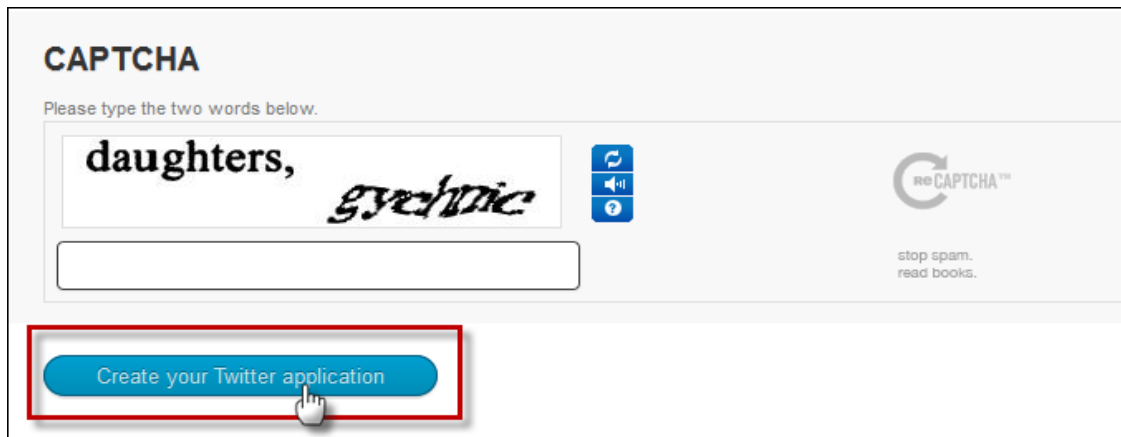

The screenshot shows the 'Callback URL' field in the Twitter developer application setup. A red circle highlights the field, and a red arrow points from a yellow callout box to it. The callout box contains the text: 'Set the callback url as sitename.com/modules/blockbelvgtwfb/ajax_twitter.php?action=callback'. Below the field, there is a small text block explaining the purpose of the callback URL.

The next thing you need is to agree with developer rules (terms and conditions) and enter Captcha information.

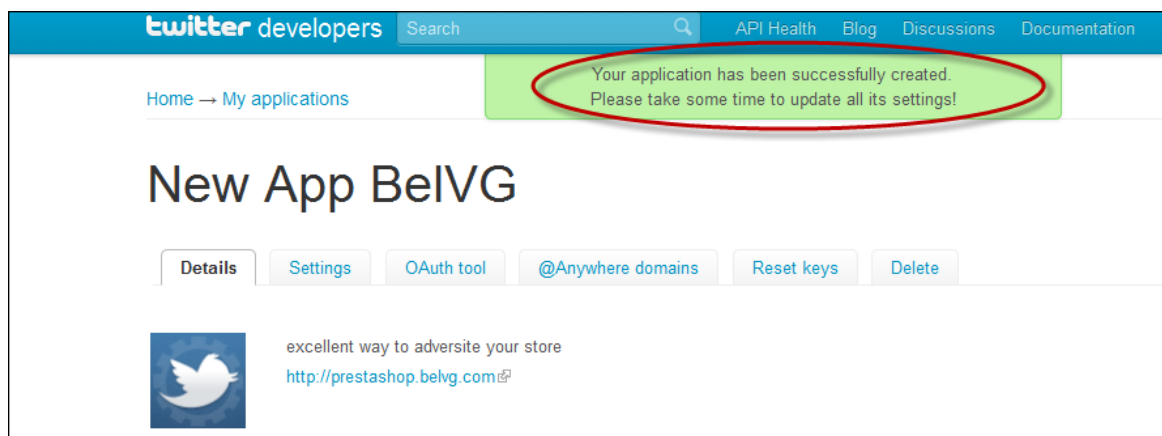

The screenshot shows the Twitter developer agreement and captcha page. A red circle highlights the 'Yes, I agree' button, and a red arrow points from a yellow callout box to it. The callout box contains the text: 'Agree with developer rules by putting a tick mark'. Below the agreement, there is a 'CAPTCHA' section with the text 'Please type the two words below.' and a captcha image showing the words 'daughters,' and 'gymnastic'. A red circle highlights the input field for the captcha, and a red arrow points from a yellow callout box to it. The callout box contains the text: 'Enter Captcha information'. At the bottom of the page, there is a blue button labeled 'Create your Twitter application'.

Finally press the **Create your Twitter application** button.

Here is the page with your new application in Twitter.

Now your Twitter App is created. Congratulations!

5. How to Configure

Log in to the admin panel, and we will show you how to configure the extension step by step.

To view the extension settings, go to **Modules** → **Other Modules** → **Facebook and Twitter Connect Configure** → **Settings**.

All you may want to configure is right here.

The screenshot shows the Prestashop admin panel with the 'Modules' menu selected. The 'Facebook Settings' section is expanded, showing the 'Facebook Application Id' and 'Facebook Secret Key' fields. The 'Twitter Settings' section is also expanded, showing the 'Consumer key' and 'Consumer secret' fields. A red box highlights the Facebook settings, and another red box highlights the Twitter settings. Yellow callout boxes provide instructions on how to obtain the required keys and IDs.

Facebook Settings

This module was developed by www.BelVG.com. For docs & examples refer to the BelVG website. We have the largest selections of [extensions](#) and [themes](#) on Prestashop.

Facebook Application Id:

This is the Application ID you need to get for your application to work. You can get it from here <http://www.facebook.com/developers>

Facebook Secret Key:

This is the Secret Key you need to get for your application to work. You can get it from here <http://www.facebook.com/developers>

Twitter Settings

Consumer key:

Consumer secret:

[Update](#)

Connect your store to Facebook using the key and ID your received upon Facebook app creation

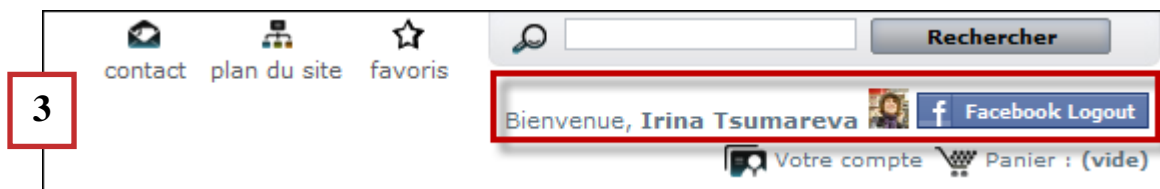

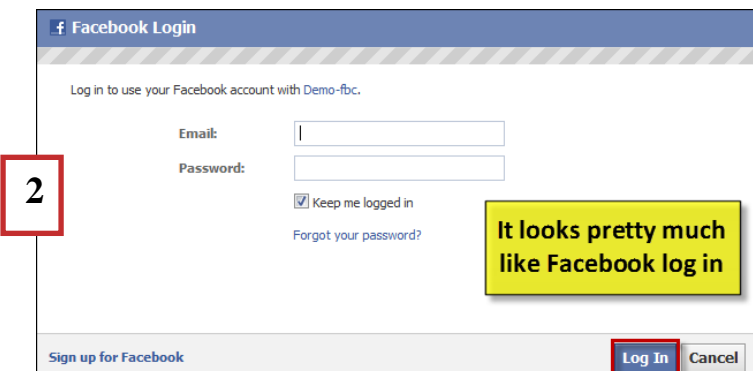

Connect your store to Twitter using the key and secret you received upon Twitter app creation

6. How to Use

It's time to get acquainted with **Facebook and Twitter Connect** features and the ways customers may use them. We will visually review extension options and activities related to them. Eventually you will be able to see how your users' actions are mirrored on Facebook.

5.1. How to log in with Facebook account

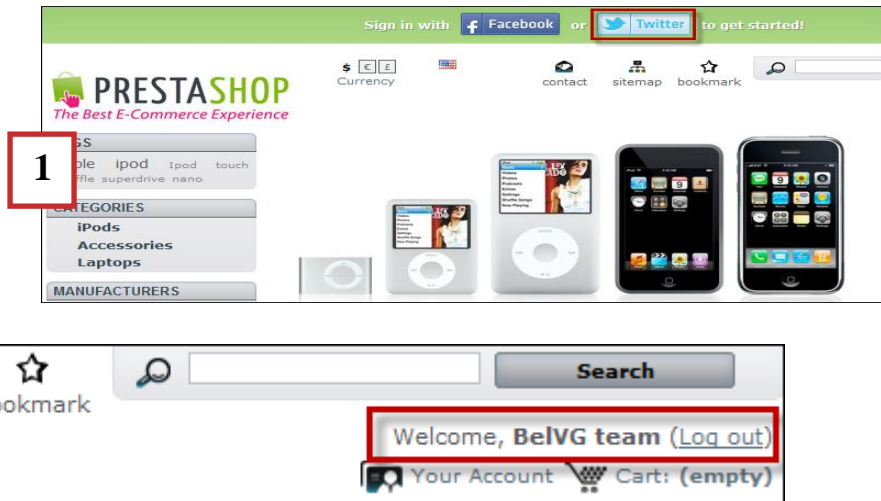

1. Facebook Login button. Customers will log in to the system using their Facebook accounts.

The customer's avatar is automatically displayed when he/she is logged in.

5.2. 5.2 How to log in with Twitter account

2. Twittter Login button. Customers will log in to the system using their Twitter accounts.

The customer's avatar is automatically displayed when he/she is logged in.
