3. How to Configure

1. Introduction to Full Page Cache

Increase your site's speed dramatically with **Prestashop Full Page Cache**. A fast site places higher in search engines and directly makes profits higher than ever. Enable or disable caching on any page of your eShop. Select a hook or specific modules to be cached. Enter the cache lifetime and enjoy a significantly boosted website performance with pages loading twice as fast as before.

Key features:

- Doubling the speed of your web store
- Reducing operating costs
- Enabling or disabling caching on any page
- Caching modules and hooks
- Configurable cache lifetime
- Increasing ranking in search engines

Overall information

By storing data in cache and serving it from cache when requested, we save the time needed to generate the data. That is what makes caching a cheap and effective way to improve the performance of your web store.

Speeding up websites is important - not just to site owners, but to all Internet users. Faster sites create happy users, Google internal studies show. When a site responds slowly, visitors spend less time there. Faster sites don't just improve user experience; improving site speed also reduces operating costs. That is why Google considers site speed when ranking websites and determining how many pages to crawl.

Prestashop Full Page Cache not only improves your ranking in search engines, but also enhances user experience on your store. Try it now!

2. How to Install and Deactivate

How to Install

1. Set 777 or 0777 on the folders: '/modules/', '/cache/'.

Important! Change all permissions back after installation.

2. Modules -> Add a module from my computer -> Choose the file (fullpagecache.zip) -> Upload this module. Choose module in section "Front Office Features" and install module

3. Preferences -> Performance -> Smarty-> Force compile -> Yes

Preferences -> Performance -> Smarty-> Cache: No

How to Deactivate

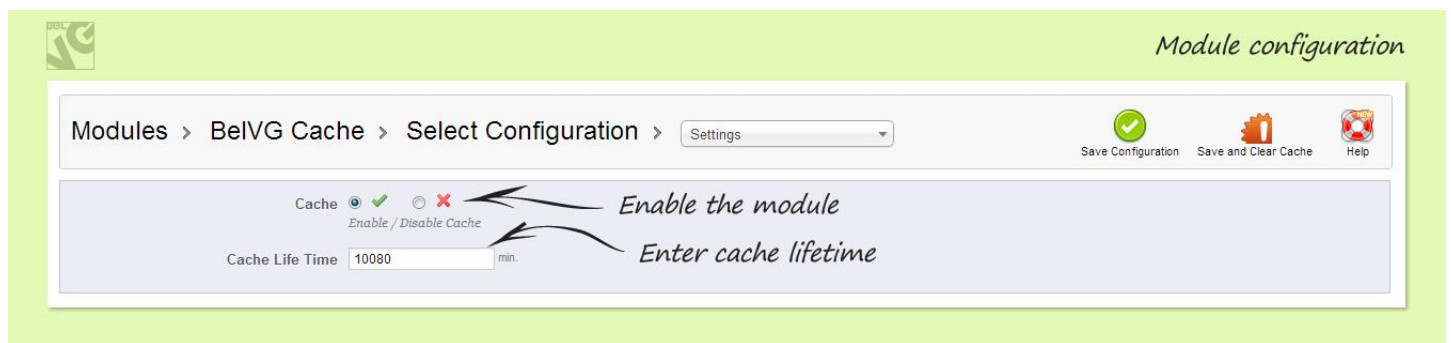

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension from the server, press **Delete** in Modules -> Front Office Features.

3. How to Configure

Log in to the admin panel, and we will show all you may need to configure.

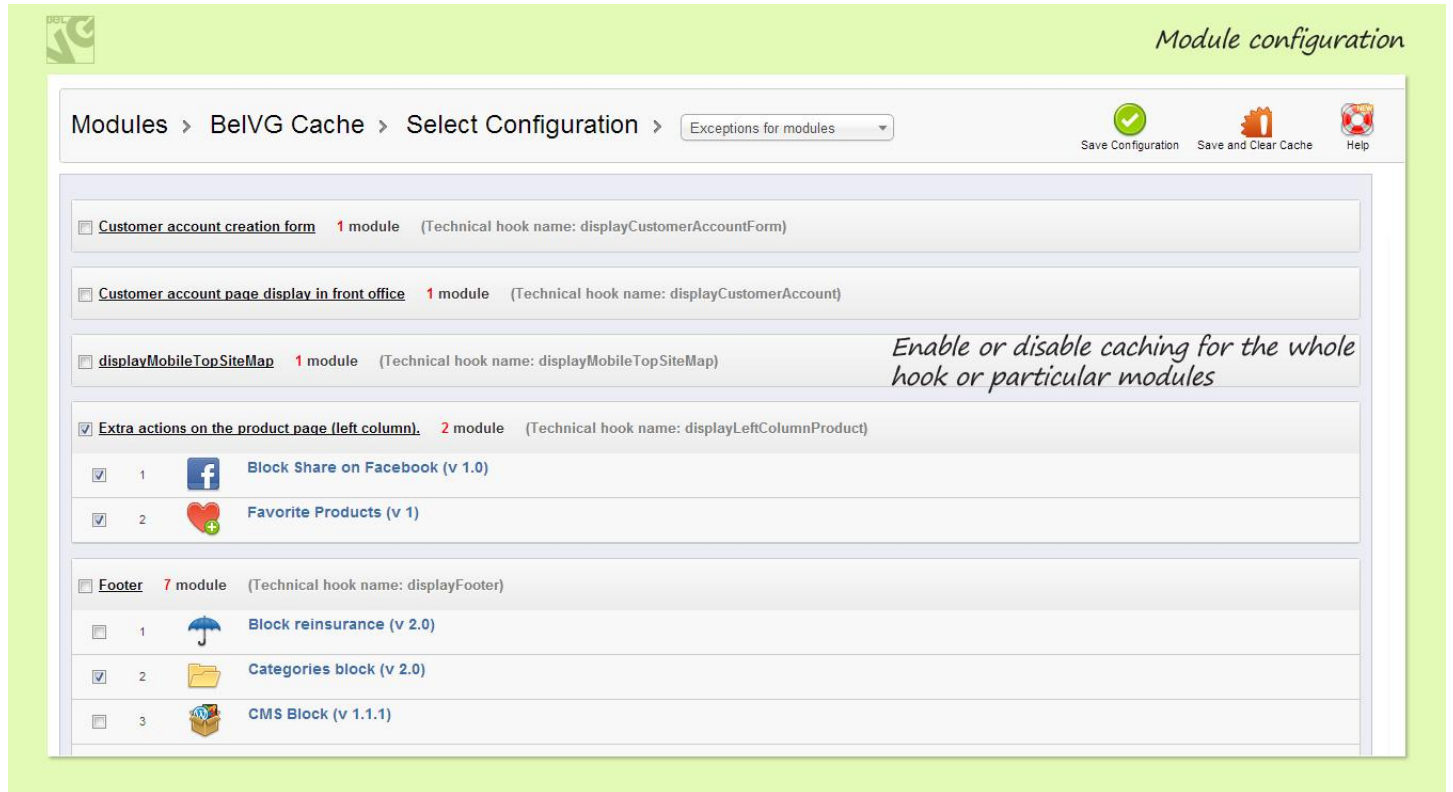

Navigate to **Modules -> Full Page Cache -> Configure**.

To enable the extension, select the tick mark in the **Cache** line. In the **Cache Lifetime** field, enter cache lifetime in minutes.

Click the drop-down in the actions bar and select **Pages Cache**.

Click the drop-down in the actions bar and select **Exceptions for modules**.

Module configuration

Modules > BelVG Cache > Select Configuration > Exceptions for modules

Customer account creation form 1 module (Technical hook name: displayCustomerAccountForm)

Customer account page display in front office 1 module (Technical hook name: displayCustomerAccount)

displayMobileTopSiteMap 1 module (Technical hook name: displayMobileTopSiteMap)

Extra actions on the product page (left column) 2 module (Technical hook name: displayLeftColumnProduct)

- 1  Block Share on Facebook (v 1.0)
- 2  Favorite Products (v 1)

Footer 7 module (Technical hook name: displayFooter)

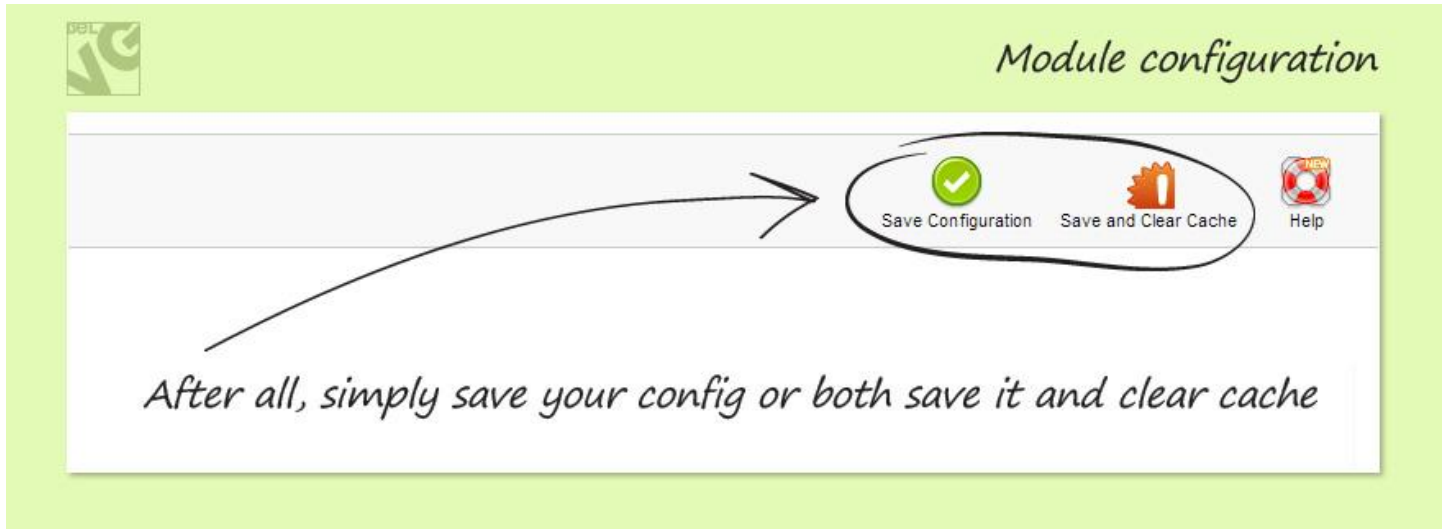

- 1  Block reinsurance (v 2.0)
- 2  Categories block (v 2.0)
- 3  CMS Block (v 1.1.1)

Enable or disable caching for the whole hook or particular modules

Save Configuration Save and Clear Cache Help

Select particular modules or whole hooks to exclude them from caching.

After you're all set, click either **Save Configuration** or **Save and Clear Cache** in the actions bar.

The cache will be automatically cleared after any actions with products in the back-office.
