## 1. Introduction to Infinite Scroll

Prestashop Infinite Scroll adds an innovating feature of loading paginated web pages. In fact, the module pre-fetches content from a subsequent page and adds it to the one the user is currently at. A large feed of data in your store will be displayed in a user-friendly manner, with no pages and reloads, and customers will appreciate it. The feature concerns all types of lists the user can possibly encounter in your eShop: catalog pages, search results, manufacturers and suppliers lists, new products, etc.

### Key features:

- Scrolling through lists without pages and reloads
- Easy-to-use intuitive navigation
- No complicated settings
- Content remains SEO-friendly
- Touch devices support
