2.	How to Install and Deactivate	. 4
3.	How to Configure	. 5

### 1. Introduction to Share and Follow

Integrate your online store with various social services. Install Prestashop Share and Follow module to encourage customers to follow your corporate social profiles and share store products on Facebook, Twitter, Pinterest, Foursquare, Instagram and others. There is no need to create special social apps for your store; you add service buttons to be displayed in the back-office.

#### Key features:

- Following store profile on various networks (Facebook, Twitter, LinkedIn, Google+, YouTube, Pinterest, Instagram, Foursquare, Tumblr, RSS, Vimeo, Flickr)
- Sharing feature
- Showing Follow and Share buttons on any page of the store
- Integration with addthis.com (all new services will be added automatically)

#### General information

Social marketing is as important for eCommerce businesses as skillful administration. Surround customers with opportunities to tell friends about your products and stay updated on store news via your corporate social profiles.

Social buttons may be displayed at any place of the store – homepage, product page, checkout, left column, etc. Configure their style and position in the admin panel.

Don't worry if a new social network appears and you are not connected to it. We integrated this module with addthis.com, so all present-day services will be added automatically.

### 2. How to Install

1. Set 777 or 0777 on the folders: '/modules/'

Important! Change all permissions back after installation.

- Modules -> Add a module from my computer -> Choose the file (sharefollow.zip) -> Upload this module.
   Choose module in section "Front Office Features" and install module
- Preferences -> Performance -> Smarty-> Force compile -> Yes
   Preferences -> Performance -> Smarty-> Cache: No

## How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension form the server, press **Delete** in Modules -> Front Office Features.

That's all! Enjoy the Share and Follow performance.

#### **Disclaimer!**

It is highly recommended to backup your server files and database before installing this module. No responsibility can be taken for any adverse effects installation or advice may cause. Recommended you install on a test server initially to carry out your own testing.

## 3. How to Configure

Log in to the back office, and we will show you how to configure the extension step by step. It's easy.

To view Follow settings, go to **Modules -> Follow**.
