1. Introduction to Social Connect

Prestashop Social Connect module allows visitors to avoid annoying procedure of standard registration and log in to a store with their social accounts. The user chooses one of 11 social services or mailing systems to enter the site. Strip with 11 stylish minimalistic icons appears on the "Log in" page.

This module gives a possibility to log in to your store with an existing account on any popular social network or mailing system.

There are 11 IDs for users to register with.

- Login with Google ID
- Login with Facebook ID
- Login with Twitter ID
- Login with AOL ID
- Login with Clavid ID
- Login with Flickr ID
- Login with MySpace ID
- Login with Yahoo ID
- Login with WordPress ID
- Login with LiveJournal ID
- Login with Open ID

Overall information

With our module the feature of multiligin will be added to the standard Prestashop log in page. Visitors will see a stripe with 11 pretty icons with logos of popular social and mailing services. Users click on any of them, and the window will appear with suggestion to enter login and password of corresponding service.

2. How to Install

1. Set 777 or 0777 on the folders: '/modules/', '/override/controllers/' Important! Change all permissions back after installation.

- Modules -> Add a module from my computer -> Choose the file (socialconnect.zip) -> Upload this module.
 Choose module in section "Front Office Features" and install module
- Preferences -> Performance -> Smarty-> Force compile -> Yes
 Preferences -> Performance -> Smarty-> Cache: No

How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension form the server, press **Delete** in Modules -> Front Office Features.

That's all! Enjoy the **Social Connect** performance.

Disclaimer!

It is highly recommended to backup your server files and database before installing this module. No responsibility can be taken for any adverse effects installation or advice may cause. Recommended you install on a test server initially to carry out your own testing.

3. How to Create Facebook App

To create a Facebook app you need to go to the <u>http://developers.facebook.com/</u> and choose **Build for websites** option (on the left side).

Then choose the Apps tab.

Developer Rules Of The Road	
Last Update - 17th of May 2012	*
Rules of the Road	
Twitter maintains an open platform that supports the millions of people around the world who are sharing and discovering what's happening now. We want to empower our ecosystem partners to build valuable businesses around the information flowing through Twitter. At the same time, we aim to strike a balance between encouraging interesting development and protecting both Twitter's and users' rights.	
So, we've come up with a set of Developer Rules of the Road ("Rules") that describe the policies and philosophy around what type of innovation is permitted with the content and information shared on Twitter.	
The Rules will evolve along with our ecosystem as developers continue to innovate and find new, creative ways to use the Twitter API, so please check back periodically to see the most current version. Don't do anything prohibited by the Rules, but talk to us if you think we should make a change or give you an exception.	
If you will eventually need more than 5 million user tokens for your projects, you will need to talk to us directly about access to the Twitter API.	
Ves, I agree By clicking the "I Agree" by putting tick mark CAPTCHA	
This question is for testing whether you are a human visitor and to prevent automated spam submissions.	
Enter Captcha information	
Create your Twitter application	

Finally press the Create your Twitter application button.
