1. Introduction to Product Votes and Rating

Prestashop Product Votes and Rating module adds a configurable "rate" button to every product.

Primary goal of the extension is getting statistics about user behavior and products they like or dislike the most.

So basically this is an easy rating system, that does voting and rating.

Key features:

- Easy and popular way to gather statistics towards your products
- Simple button management
- 3 options of vote buttons

Overall information:

Prestashop Product Votes and Rating module allows your customers to vote for and against the products.

If you set up the Up rating button only, users will not be able to vote against products anymore.

You can view the statistics of users' votes in the admin panel.

Pick up the most fitting button type and enjoy watching how some of the products become more popular with the rate.

2. How to Install

1.Set 777 or 0777 on the folders: '/modules/xxxbelvgmodule/' Important! Change all permissions back after installation.

2.Back Office > Preferences > Performance - enable the Force compile.

3.Copy the xxxbelvgmodule module to modules folder.

4.Back Office > Modules > Pricing & Promotion and install.

How to Deactivate

4. How to Use

Let's review how customers will see your rating system.

The default settings are Up and Down Buttons. The customer needs just to click the button to show his attitude towards this product. The number of votes is updated instantly.

The vote count is displayed instantly.

You can choose **Up button** to display the up button only. The customer sees just one simple attention dragging green button and votes for your products.

If you don't want to draw too much attention to votes, then your best choice will be Mini type.
