4. How to Use

## 1. Introduction to Scroll Top Free

Make it possible for your customers to return to the top of the page with one simple click. The module adds a smooth scrolling effect and eliminates the need to torture the mousewheel to scroll through loads of content. The Scroll Top button is not always visible, appearing only if the page is scrolled down. Scrolling is slight and animated: no page refreshing or sharp jumps. Scroll Top module is totally free!

### Key features:

- Scroll Top button
- Configurable scrolling animation
- Possibility to upload the button image
- Totally free module

### Overall information

Scroll Top Free module is fully customizable, enabling you to make the best possible use of it. Enter when the button should appear, fade in and fade out duration and time the page scrolls to the top, upload button image and configure its position and size.

The module is perfect for stores with lots of long pages. Provide your customers with a possibility to jump right to the top easily. It improves the browsing experience and encourages users to spend more time on your eShop.

## 2. How to Install

1. Set 777 or 0777 on the folders: '/modules/'

**Important! Change all permissions back after installation.**

2. Modules -> Add a module from my computer -> Choose the file (scrolltop.zip) -> Upload this module. Choose module in section "Front Office Features" and install module

3. Preferences -> Performance -> Smarty-> Force compile -> Yes  
Preferences -> Performance -> Smarty-> Cache: No

## How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension from the server, press **Delete** in Modules -> Front Office Features.

### 3. How to Configure

Log in to the admin panel, and we will show all you may need to configure.

Navigate to **Modules** -> **Scroll Top Free** -> **Configure**.

The screenshot shows the 'Scroll Top Configuration' interface. It includes a 'Help' icon in the top right corner. The configuration fields are as follows:

|                  |                                                        |                                            |
|------------------|--------------------------------------------------------|--------------------------------------------|
| Start Line       | 100                                                    | ← Determine when Scroll Top button appears |
| Scroll Duration  | 1000                                                   | } ← Configure scrolling animation          |
| FadeIn Duration  | 500                                                    |                                            |
| FadeOut Duration | 100                                                    |                                            |
| Width            | 50                                                     | } ← Configure button size and position     |
| Height           | 50                                                     |                                            |
| Offset X         | 25                                                     |                                            |
| Offset Y         | 25                                                     |                                            |
| Image            | <input type="button" value="Select"/> No file selected | ← Upload button image                      |
|                  | <input type="button" value="Save"/>                    |                                            |

In the **Start Line** field, enter how many pixels should be scrolled manually before Scroll Top button appears, in pixels.

In the **Scroll Duration** field, enter how long it will take to scroll to the top, in milliseconds.

In the **FadeIn Duration** and **FadeOut Duration** fields, enter how long it will take the button to appear and disappear correspondingly, in milliseconds.

In the **Width** and **Heights** fields, determine button image size, in pixels.

In the **Offset X** and **Offset Y** fields, enter number of pixels between the image and the right hand side and bottom page borders correspondingly, in pixels.

In the **Image** area, upload button image.

Save the configuration.

## 4. How to Use

Scroll Top button appears on the front end. User clicks it to be scrolled to the top.

The screenshot displays the BELVG e-commerce front end. The page layout includes a top navigation bar with 'Home', 'iPods', and 'Accessories'. On the left, there are sections for 'TAGS' (ipod, apple), 'CATEGORIES' (iPods, Accessories, Laptops), 'MANUFACTURERS' (Apple Computer, Inc., Shure Incorporated), 'SUPPLIERS' (AppleStore, Shure Online Store), and 'INFORMATION' (Delivery, Legal Notice, Terms and conditions of use, About us, Secure payment, Our stores). The main content area features a 'FEATURED PRODUCTS' section with four items: iPod Nano (\$158.07), iPod shuffle (\$66.05), MacBook (\$1,170.57), and iPod touch (\$241.64). To the right, there are 'NEW PRODUCTS' and 'SPECIALS' sections. A 'Scroll Top' button, represented by an upward-pointing arrow, is located in the bottom right corner of the page content area, circled in red. An arrow points from the text 'Scroll Top button on the front end' to this button. The 'SPECIALS' section shows an iPod Nano with a 5% discount from \$166.99 to \$158.07.
