1. Introduction to 360° View

Provide your customers with outstanding panoramic experience. Prestashop **360° View** extension allows rotating products to check them out from different angles. Users will appreciate the possibility of spinning your items 360° round to view them closely, just like in a regular store. Simply upload images in the back office and leave your customers no doubt they should purchase your products.

Key features:

- 360° view option for all products in your store
- Using mouse to view 360° product
- Extra button on a product page
- 360° image and popup size configuration
- Touch devices support

Overall Information

Innovative 360° view capture technology can now be easily used in your store, without any professional photo studios involved. Simply shoot the product from different angles using any camera and upload images in the back office with one click. The user can check out 360° view along with regular item images.

Popup window for 360° view is fully customizable. All images can be automatically adjusted for every 360° view so that you wouldn't upload them one more time. Don't hesitate any longer, upload photos and inject real life experience into you virtual store!

2. How to Install and Deactivate

How to Install

1. Set 777 or 0777 on the folders: '/modules/'

Important! Change all permissions back after installation.

2. Modules -> Add a module from my computer -> Choose the file (belvg_360view.zip) -> Upload this module. Choose module in section "Front Office Features" and install module

3. Preferences -> Performance -> Smarty-> Force compile -> Yes

Preferences -> Performance -> Smarty-> Cache: No

How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension from the server, press **Delete** in Modules -> Front Office Features.

3. How to Configure

Log in to the admin panel, and we will show all you may need to configure.

Navigate to **Modules** -> **Belvg 360 view** -> **Configure**.

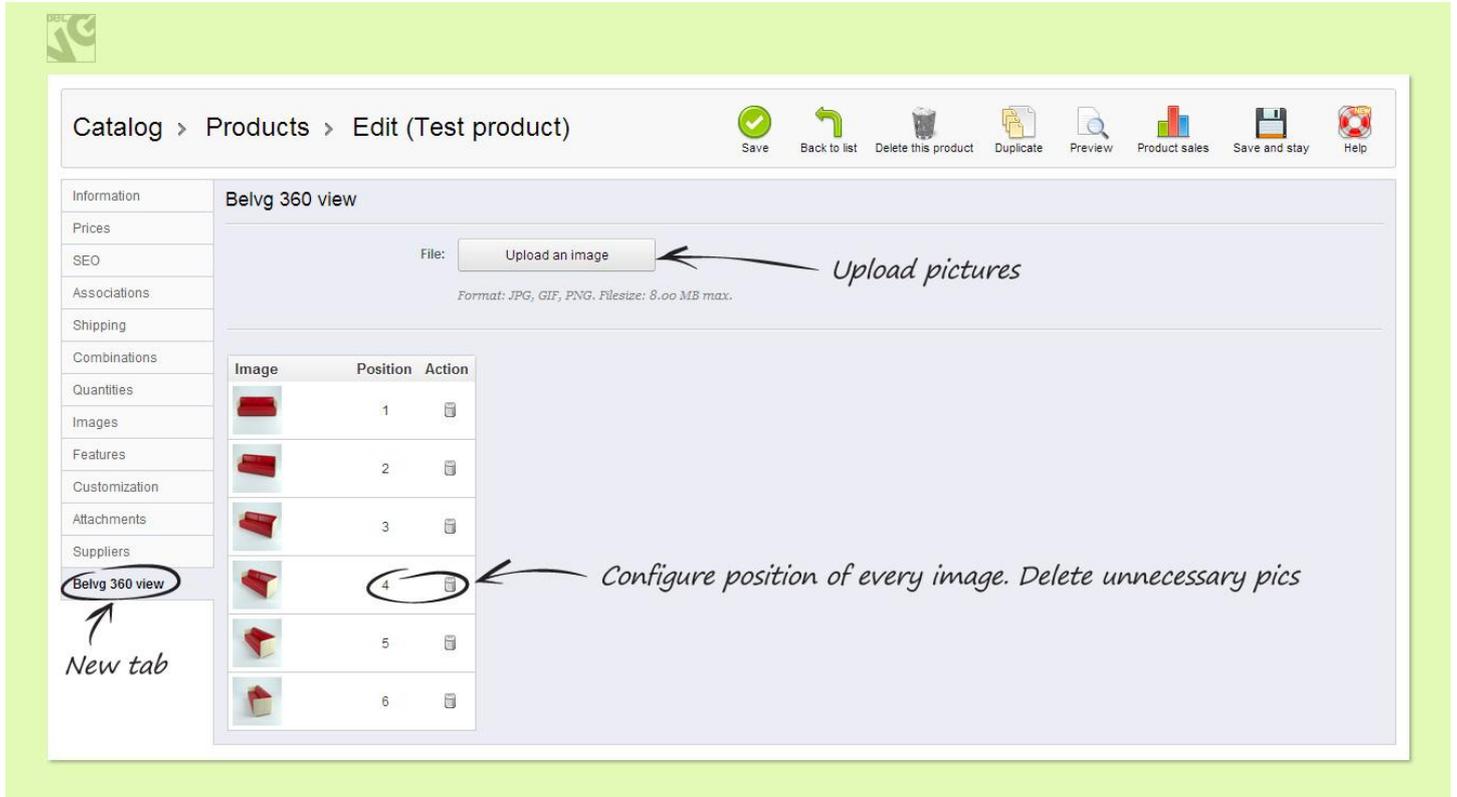

The screenshot shows the 'Module configuration' page for 'Belvg 360 view'. At the top right, there are three buttons: 'Save' (green checkmark), 'Regenerate Images' (yellow warning triangle), and 'Help' (red lifebuoy). The 'Regenerate Images' button is circled in red, and an arrow points from it to the text 'Adjust images to a popup window'. Below the buttons, there are two input fields: 'Image width: 600' and 'Image height: 450'. A bracket groups these fields with the text 'Define image size'. A small asterisk and the text '* Required field' are visible at the bottom left of the configuration area.

Define width and height of the 360° view popup window. All the images, uploaded after you define the size, will be adjusted to these dimensions. To adjust elder images to the popup window, click

Regenerate Images.

To create a 360° view, upload pictures of a product taken from different angles. To upload images, proceed to **Catalog** -> **Products**. Click the **Edit** action in the respective line.

Catalog > Products > Edit (Test product)

Save Back to list Delete this product Duplicate Preview Product sales Save and stay Help

New tab

File: Upload pictures

Format: JPG, GIF, PNG. Filesize: 8.00 MB max.

Image	Position	Action
	1	
	2	
	3	
	4	
	5	
	6	

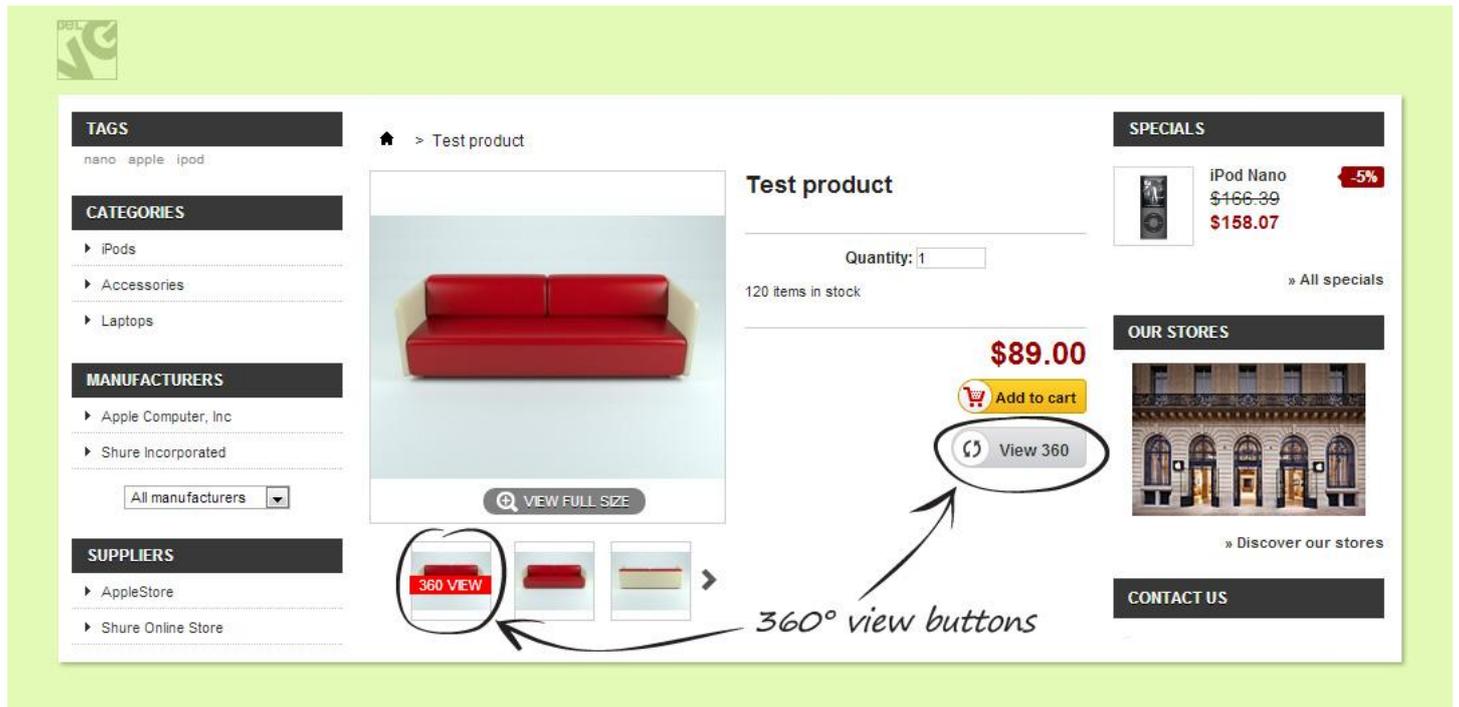

Configure position of every image. Delete unnecessary pics

In the **Belvg 360 view** tab, click **Upload an Image**. You may upload several images at once.

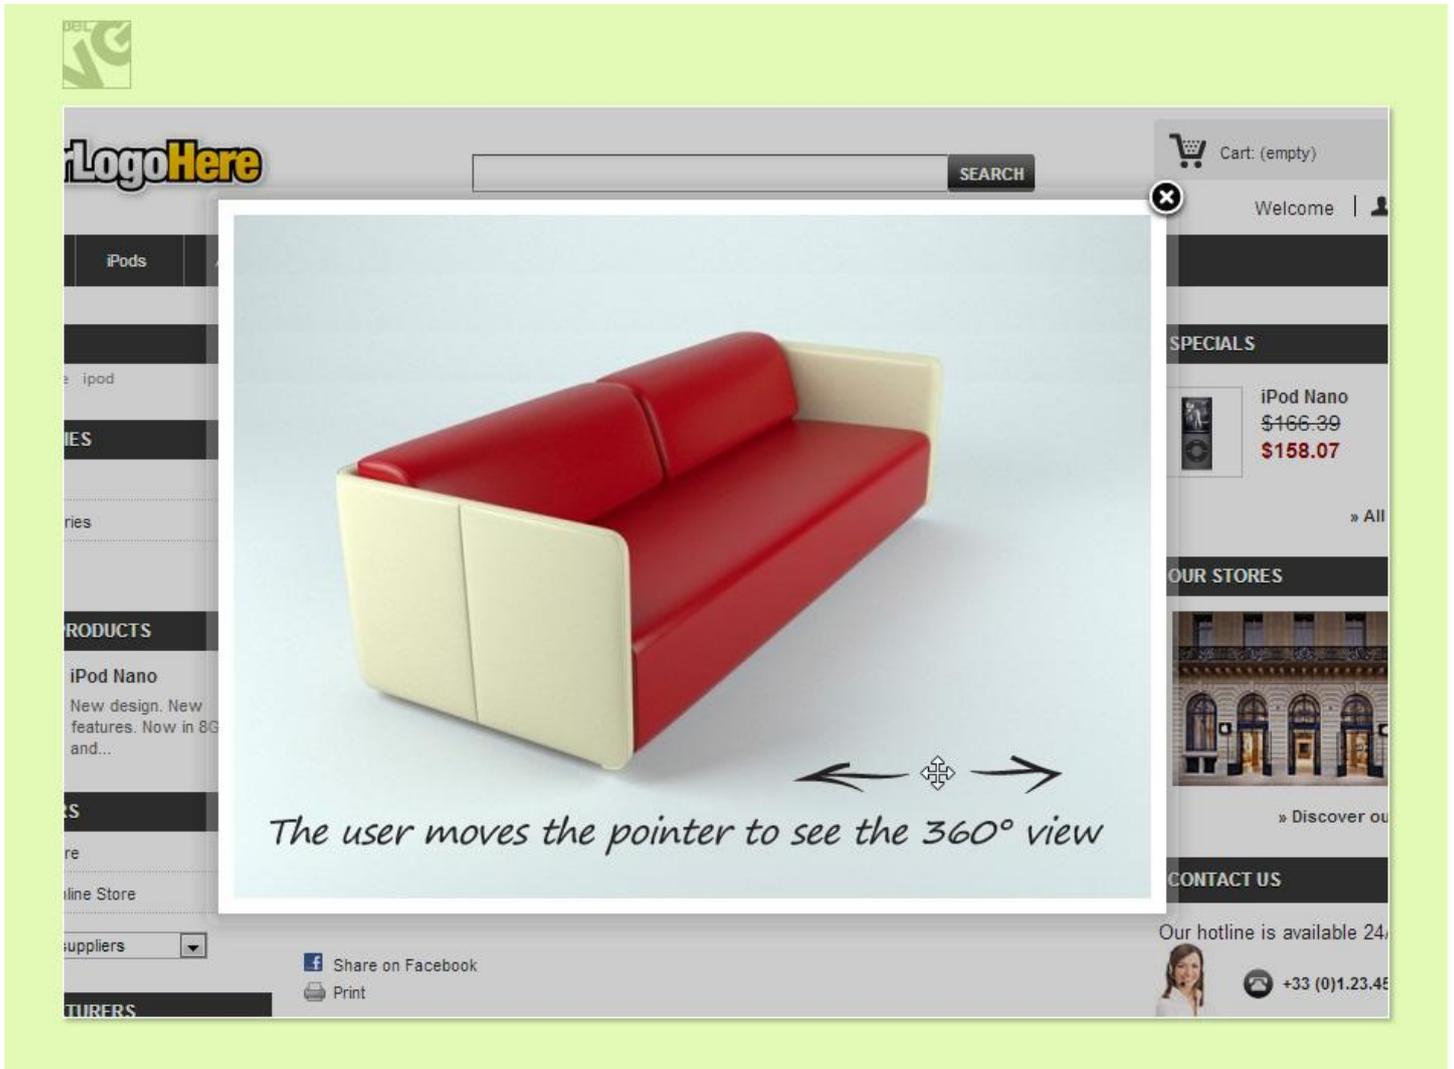

After the upload, thumbnails appear. Configure position of an image by entering the respective number or delete it.

4. How to Use

Now that you have created a 360° view for the product, buttons on the product page appear:

The user moves the pointer to rotate the product:

Do you have questions about extension configurations?
