BELVG

v. 1.4

Table of Contents

1. Introduction to Accumulative Discounts

Assign automatic discount rules for your customers with **Prestashop Accumulative Discounts**. Set discount levels the customer gets after reaching a configured total order amount. Users can view information on the current level and discount, amount left to proceed to the next level as well as overall discounts info.

Key features:

- Creating discount rules and applying them to customers upon reaching configured order amount
- Possibility to enter customer order amount manually
- Selecting statuses of orders to be calculated
- Discounts info in user account

Overall information

Use the extension to configure a flexible discount program and generate interest among present and potential customers. Set accumulation levels and corresponding discount percent. Select statuses of orders whose amounts you want to be calculated.

The extra Accumulative discounts tab appears in user account menu. It includes information about the current user level and discount, total order and left to proceed to the next level amount, overall discounts and levels info.

In the back-office, edit customer total order amount manually, if necessary.

2. How to Install

1. Set 777 or 0777 on the folders: '/modules/'

Important! Change all permissions back after installation.

2. Modules -> Add a module from my computer -> Choose the file (accumulativediscounts.zip) -> Upload this module. Choose module in section "Front Office Features" and install module

3. Preferences -> Performance -> Smarty-> Force compile -> Yes
   Preferences -> Performance -> Smarty-> Cache: No

How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension form the server, press **Delete** in Modules -> Front Office Features.

3. How to Configure

Log in to the admin panel, and we will show all you may need to configure.

Go to **Customers -> Groups** to set discount levels. The **Default** level is already configured; every new customer is automatically assigned this level. Click **Add new** to create a new customer group, i.e., a new discount level.

Enter the name of the group and discount amount.

To configure discount rules, navigate to **Customers -> Accumulative Discounts**. Click **Add new**.

Enter the discount name and amount to apply discount from. In the drop-down, select the group (level). When total amount of all the customer orders reaches specified number, the user will receive this level and get the corresponding discount.

Finally, select statuses of orders whose amounts you want to be calculated.

There is a possibility to enter customer order amount manually. Navigate to **Customers**, select the customer in the list, enter the number in the **Existing order amount** field and save the entry.

Accumulative Discounts

Existing order amount

Save

Possibility to enter order amount manually

3. How to Use

The extra Accumulative discounts tab appears in **My account** menu. It includes information about the current user level and discount, total order and amount left to proceed to the next level, overall discounts and levels info.

When a user reaches a discount level, all the prices in the store will be shown with the corresponding discount applied.

Do you have questions about extension configurations?

Contact us and we will help you in a moment.
