## 1. Introduction to Age Verification Page

The **Age Verification Page** is a Prestashop module that allows for a special age verification window on your store. Customers, who visit your website for the first time, will be prompted to pass a simple verification to confirm that they have reached the required age to be able to view the website content.

### Key features:

- Age verification pop-up;
- Use your own custom images and text on the verification page;
- Apply verification window either for the whole website or for a specific page only;

### Overall Information

Age verification is a necessary measure for websites, which may contain explicit content that is allowed to view for adults only. For such sites we have developed a special module which prompts visitors with a popup where they have to confirm that they have come of age to be able to access the content of the site.

The main advantage of this module is that it is very flexible: with this extension you can apply the verification process either to some specific page or just for the whole site.

Moreover, the module gives you an option to upload any logo and supply it with any text you want!

## 2. How to Install and Deactivate

### How to Install

1. Set 777 or 0777 on the folders:  **'/modules/'**

**Important! Change all permissions back after installation.**

2. Go to **Modules** -> **Add a module from my computer** -> choose the file (.zip) -> upload this module. Choose module in section **Front Office Features** and install it.

3. Go to **Advanced Parameters** -> **Performance** -> click the **Clear Smarty Cache** button

### How to Deactivate

Click the button **Disable** in **Modules** -> **Front Office Features**.

To remove the extension from the server, press **Delete** in **Modules** -> **Front Office Features**.

### 3. How to Configure

So, once the module is installed it is time so set up basic configurations for your verification page.

Log into your admin panel and go to **Modules -> Modules -> Age Verification Page -> Configure**.

The settings include the following options:

#### Global settings

- **Global verification** – if you enable this option, the verification popup will be applied for all pages;
- **Single check** – this option makes the verification page appear only one time. Once the verification is passed, the page will not be displayed again when the user visits other website pages;
- **Verification age** – specify the age the user should confirm to pass the verification;

#### Logo settings

- **State** – select *Enable* if you want to display an image on your verification popup;
- **Image** – upload an image file;
- **Keep Image Ratio** – these settings allow keeping the image ratio: if you change one parameter of the image, the module will automatically adjust the other one;
- **Width** – specify image width in pixels;
- **Height** – indicate image height in pixels;

**Text 1:**

- **State** – select *Enable* if you want to add some text content to your verification page.
- **Content** – enter the text you wish to display. Using HTML tags is supported;

## Text 1 settings

State:

*select Enable if you want to add some text content to your verification page*

Content:

How to enable a verification page for a specific product or category only?

If you do not want the verification page to show up for the whole website, you can apply it to a specific page or category only.

First of all you need to select Disable in the module global settings.

After that go to Catalog --> Manage Products --> click the product for which you want to apply the verification page --> in the Verification page section select Yes

Path: p

*enter the text you wish to display. You can use HTML tags to apply to your text*

## Buttons:

- **State** – enable this option if you want to display date selection fields on the verification page, otherwise only *Leave* and *Enter* buttons will be displayed;
- **Leave text** – specify the text to display on the *Leave* button;
- **Enter text** – specify the text to display on the *Enter* button;

## Buttons settings

State:

*if you chose With Select option the verification page will offer a user to pass verification by specifying his date of birth, otherwise only Leave or Enter buttons will be displayed*

Leave text:

*specify the text to display for the Leave button*

Enter text:

*specify the text to display for the Enter button*

## Text 2

Text 2 settings allow you to add the text which will be displayed under the *Leave* and *Enter* buttons.

- **State** – select *Enable* if you want to add some text content to your verification page;
- **Content** – enter the text you wish to display. Using HTML tags is supported.

## Text 2 settings

## Confirmation checkbox

- **State** – select *Enable* to add a confirmation checkbox to the verification page;
- **Text** – specify the text which will be displayed near the confirmation checkbox;

## Custom CSS Styles

Using these settings you can apply your own custom css styles for the page. Just select *Enable* and enter the styles you wish to use.

## Confirmation checkbox and Custom CSS settings

## How to create a verification page for a specific page only?

If you do not want the verification page to show up for the whole website, you can enable it for a specific page only.

First of all you need to select **Disable** in the module global settings.

After that go to **Catalog - > Products ->** click the product for which you want to enable the verification page -> go to the **Age Verification page** tab and click *Enable* checkbox.

The screenshot shows the PrestaShop back-office interface. At the top right, the title is "Enabling verification page for a product page". The navigation menu includes Catalog, Orders, Customers, Price Rules, Shipping, Localization, Modules, Preferences, Advanced Parameters, Administration, and Stats. A hint banner reads: "Stuck? Time to become a PrestaShop Ninja! Learn how to use your Back-Office and start managing your online shop 50% faster!". The breadcrumb trail is "Catalog > Products > Edit (iPod Nano)". The product actions bar includes Save, Back to list, Save and stay, Duplicate, Preview, Product sales, Delete this product, Modules List, and Help. The left sidebar lists various settings categories, with "Age Verification Page by BELVG" selected. The main content area shows the "Belvg Age Verification Page" settings, with a "Verification Page" option set to "On" (indicated by a green checkmark).

## 4. How to use

So, not let's see what kind of verification page your customers will see after you apply it.

We have set up a global verification page for the whole website. So, when you visit the site for the first time you are welcomed with a verification popup.

The popup window shows up the image which we have uploaded, text content and the verification checkbox.

The page displays the uploaded image, text and verification checkbox

18+  
ADULTS ONLY

Day: 1 ▼ Month: 1 ▼ Year: 2014 ▼

- Leave - - Enter -

Must be 18 or older

I have read and agree to the Terms and Conditions

The screenshot shows a white rectangular area on a black background. At the top left of the white area is a small logo. The main content is a large red circle containing the text '18+' in large black font and 'ADULTS ONLY' in smaller red font below it. Below the circle are three dropdown menus for 'Day', 'Month', and 'Year', each with a small downward arrow. Below these are two buttons: an orange one with '- Leave -' and a grey one with '- Enter -'. Below the buttons is the text 'Must be 18 or older'. At the bottom is a checkbox followed by the text 'I have read and agree to the Terms and Conditions'. Three grey arrows point from the text 'The page displays the uploaded image, text and verification checkbox' to the red circle, the buttons, and the checkbox respectively.

Do you have questions about extension configurations?
