1. Introduction to Blocks Constructor

Relying on native Prestashop functionality and interface, the extension supplies your stores with static blocks for more content to be added. Leave the standard Prestashop template and layout files unchanged and insert extra blocks instead when you need to come up with ads or other vital information. Blocks are applicable to any frontend spot and easily migratable according to admin's wish.

Key features:

- Adding blocks to any frontend spot. More than fifty hooks (page sections) exist in Prestashop template, and blocks can be placed in all of them.
- Inserting unlimited number of blocks
- Creating blocks with text, images and links
- Scheduling a virtual life of blocks adjusting their starting and expiring dates
- Ranging blocks order within hooks (page sections)
- Quick block editing with WYSIWYG editor included

Overall information

You have a standard Prestashop template with a predefined structure of all elements. Do you need to add advertising banners or announcements for your customers in the web-store? You don't have to remodel the basics of your template because you can make it easier with Prestashop Blocks Constructor now.

It assists you in adding extra blocks to your store hooks (page sections), in which you are free to insert text, images and links.

Point at a special offer in your store by adding the block with reminders for some time. Set its starting and expiring date, and it will disappear automatically when the time goes off.

2. How to Install

1. Set 777 or 0777 on the folders: '/modules/'

Important! Change all permissions back after installation.

2. Modules -> Add a module from my computer -> Choose the file (blocksconstructor.zip)

-> Upload this module.

Choose module in section "Front Office Features" and install module

Preferences -> Performance -> Smarty-> Force compile -> Yes
Preferences -> Performance -> Smarty-> Cache: No

How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension form the server, press **Delete** in Modules -> Front Office Features.

That's all! Enjoy the **Blocks Constructor** performance.

3. How to Configure and Use

Log in to the admin panel, and we will show you how to configure the extension step by step.

To view the extension settings, go to Modules -> Blocks Constructor.
