## 1. Introduction to Bulk Price Update

Meet the new module **Prestashop Bulk Price Update** which will help you easily change and update product prices for all products in your store with just a few mouse clicks.

### Key features:

- Update prices for all products in the store or just in the selected categories;
- Update wholesale price, retail price or unit price
- Update prices either by adding or deducting values;
- Change prices either by flat amount or by percent.

### Overall Information

From time to time you may need to update your store product prices. With the **Bulk Price Update** this task will become a piece of cake for you. The module allows you to update all prices for all products within a few minutes, so you will not waste your time doing this manually for each item separately.

Prices can be updated either for all items in the store or just for selected directories. The module settings also provide you with two options: to update prices by a certain flat amount or by specific percentage rate, which makes the module a very flexible solution.

## 2. How to Install and Deactivate

### How to Install

1. Set 777 or 0777 on the folders: **'/modules/'**

**Important! Change all permissions back after installation.**

2. Go to **Modules** -> **Add a module from my computer** -> choose the file (.zip) -> upload this module. Choose module in section **Front Office Features** and install it.
3. Go to **Advanced Parameters** -> **Performance** -> click the **Clear Smarty Cache** button

### How to Deactivate

Click the button **Disable** in **Modules** -> **Front Office Features**.

To remove the extension from the server, press **Delete** in **Modules** -> **Front Office Features**.

### 3. How to Configure

The module is super easy to use. Once it is installed, go to the admin panel to **Modules – Modules – Bulk Update All Product Prices – Configure**.

The module provides just a few options to updates your prices:

- **Categories** – select the categories, which prices you wish to update;
- **Add or Subtract** – choose, whether the value will be added or subtracted from the current prices;
- **Percent or Flat** – choose whether the prices will be updated by a flat amount or by certain percentage value;
- **Wholesale price adjustment value** – insert the value by which the wholesale prices will be updated;
- **Retail price adjustment value** – insert the value by which the retail prices will be updated;
- **Unit price adjustment value** – insert the value by which the separate unit prices will be updated.

The screenshot shows the 'General module settings' for the 'Bulk Update All Product Prices' module. The interface includes a sidebar with navigation icons, a top navigation bar with 'MODULES / BELVG\_PRICEUPDATER / CONFIGURE', and a main configuration area. The main area features a tree view of categories under 'Root (10 selected)', with sub-categories like 'Home (9 selected)', 'Women (8 selected)', 'Tops (3 selected)', 'Dresses (3 selected)', etc., each with a checkbox. Below the tree view, there are radio buttons for 'Add or Subtract' (Add selected) and 'Percent or Flat' (Percent selected). At the bottom, there are three input fields for 'Wholesale Price Adjustment Value', 'Retail Price Adjustment Value', and 'Unit Price Adjustment Value', all set to '0'. A 'Back' button and an 'Update prices!' button are also visible.

As soon as you enter the values and select the necessary directories, click the *Update Prices* button and the selected categories will be instantly updated with the new prices.

Do you have questions about extension configurations?
