- 4. How to Use

1. Introduction to Extended Header

Prestashop Extended Header module allows adding a header to your store and editing it easily and quickly. The settings are intuitive: simply configure header size and background color, create blocks to be displayed within, click any block and drag it to the best position on the preview. Block content is created in the WYSIWYG editor. Feel free to compose lots of headers and assign them to different stores of yours.

Key features:

- Advanced header view
- Configuring header size and background
- Header angles rounding
- Creating blocks and positioning them inside the header
- Live header preview
- WYSIWYG blocks content editor
- Managing headers for a Multilanguage store

Overall information

Whichever website you visit, the first thing that you will intuitively use to navigate or pay attention to is a header. Give a whole new life and excitement to this significant tool, because, you know, a dull or ill-convinced header might just kill the experience.

After activating and configuring the header, a small stylish tab appears at the top of the page. The user clicks it and the header slides. Any content can be used within, including blocks with eye-popping graphics, snappy typography, text and links.

2. How to Install and Deactivate

How to Install

1. Set 777 or 0777 on the folders: '/modules/' Important! Change all permissions back after installation.

2. Modules -> Add a module from my computer -> Choose the file (belvg_extendedheader.zip) -> Upload this module. Choose module in section "Front Office Features" and install module

3. Preferences -> Performance -> Smarty-> Force compile -> Yes Preferences -> Performance -> Smarty-> Cache: No

How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension form the server, press **Delete** in Modules -> Front Office Features.

3. How to Configure

Log in to the back-office, and we will show you how to configure the module step by step. To view module settings, go to **Modules –> Extended Header**.

The list of existing headers is being displayed here. To create a new one, click the Add new button.

Modules > BelVG Header		Add new
²age 1 / 1 Display 50 ▼ / 1 result(s)	Grid with headers	Reset Filte
ID Title		Actions
TA TA

4. How to Use

That's the way extended header will look on the front-office. The user clicks the tab for the header to appear.

Do you have questions about extension configurations?

Contact us and we will help you in a moment.
