1. Introduction to Facebook All in One

Facebook All In One extension introduces your Prestashop store to a variety of Facebook features. Facebook login, Like and Share blocks are just a few of them. This is a must-have solution for every growing store. Be ahead of traditional marketing strategies and encourage your viewers to leave comments, like your pages and share their purchases with friends.

Key features:

- Facebook Login;
- Like button is added to all products;
- Comments are available on product page;
- Sharing successfully completed orders;
- Recent activities block;
- Recommendations blocks.

Overall information

Facebook Login allows your customers to log in to the system safely, using their Facebook accounts.

The **Facebook Like** strengthens the impact and increases the traffic of your store. The more likes you have, the more customers you get.

Facebook-based **Comments** reflect the interest of your clients and give reasons to purchase to those who are uncertain.

With **Facebook Share** feature your customers can share successfully completed orders and wishlists with their Facebook friends.

Activity and **Recommendations** blocks illustrate all Facebook-related activities: Posts, Likes and Shares.

2. How to Install and Deactivate

1. Set 777 or 0777 on the folders: **'/modules/'**

Important! Change all permissions back after installation.

2. Go to **Modules** -> **Add a module from my computer** -> choose the file (.zip) -> upload this module. Choose module in section **Front Office Features** and install it.
3. Go to **Advanced Parameters** -> **Performance** -> click the **Clear Smarty Cache** button

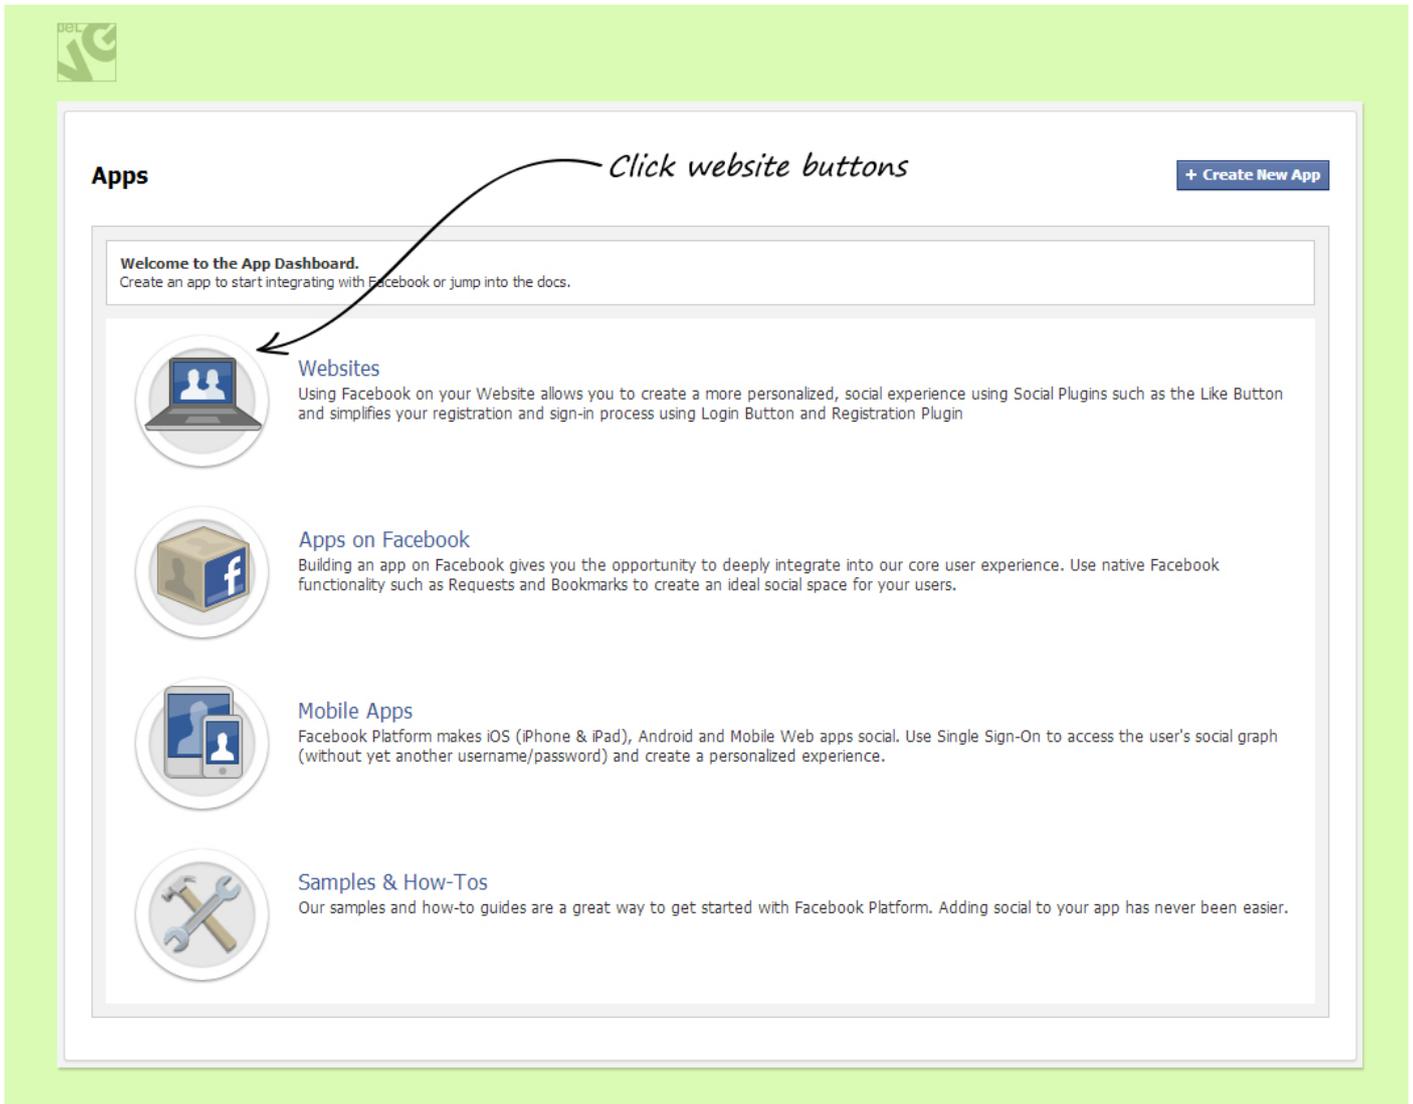

How to Deactivate

Click the button **Disable** in **Modules** -> **Front Office Features**.

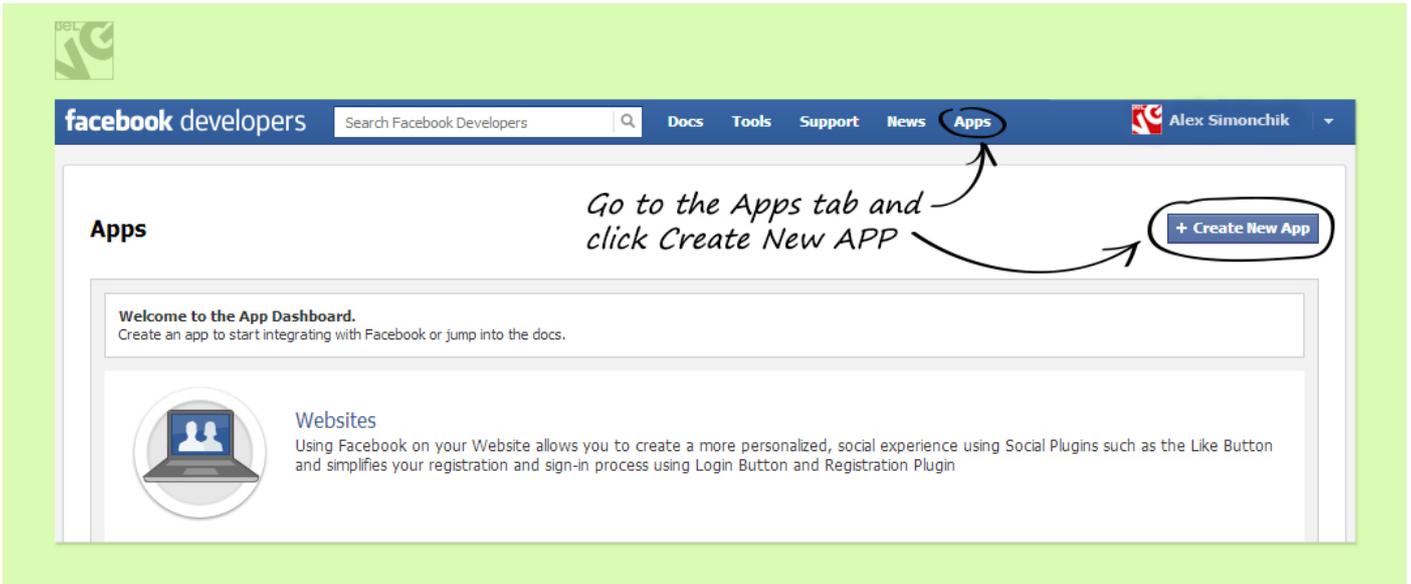

To remove the extension form the server, press **Delete** in **Modules** -> **Front Office Features**.

3. How to Create Facebook App

To create a Facebook app first you need to go to <http://developers.facebook.com/> and register as a developer. After that, click the **Websites** option (on the left side).

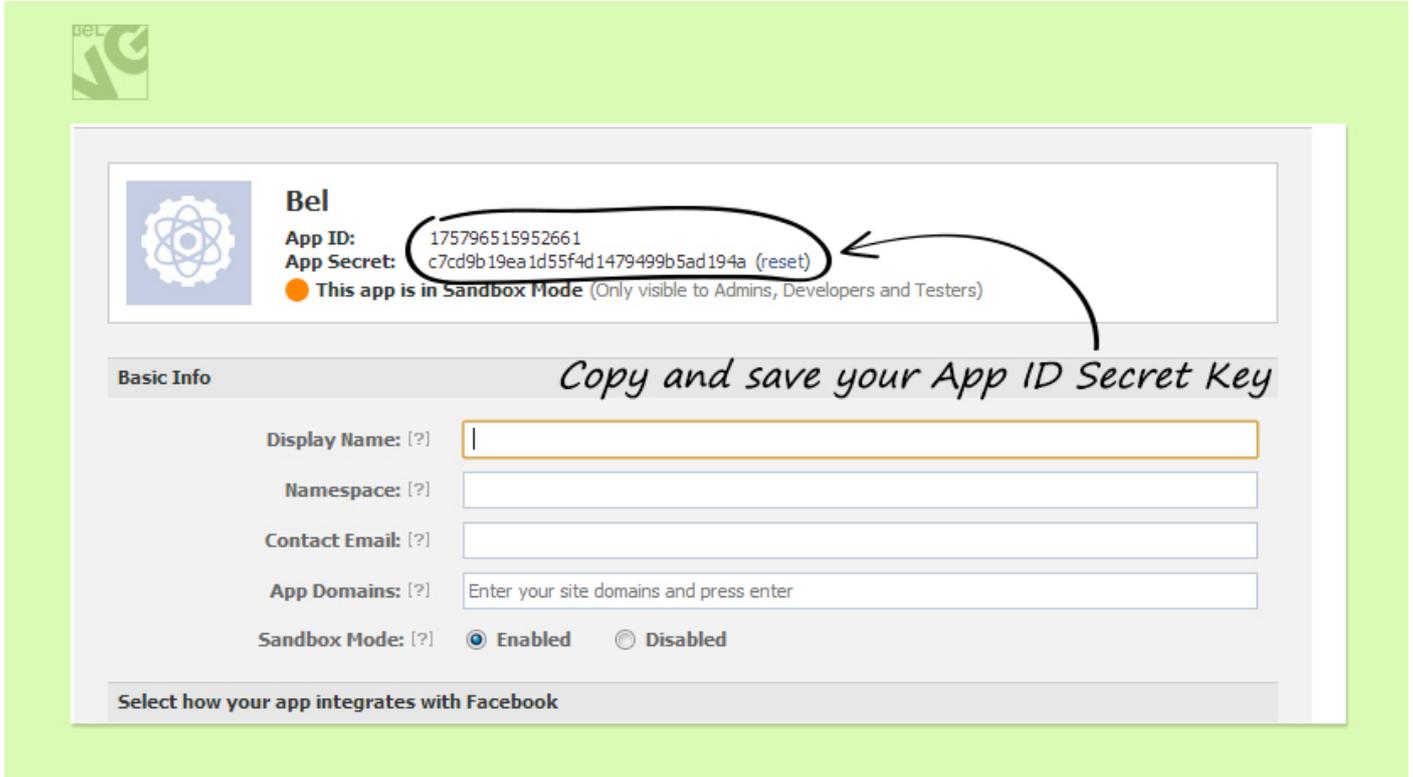

Then go to the **Apps** tab and click **+ Create a New App**.

Enter your application name, namespace and choose application category.

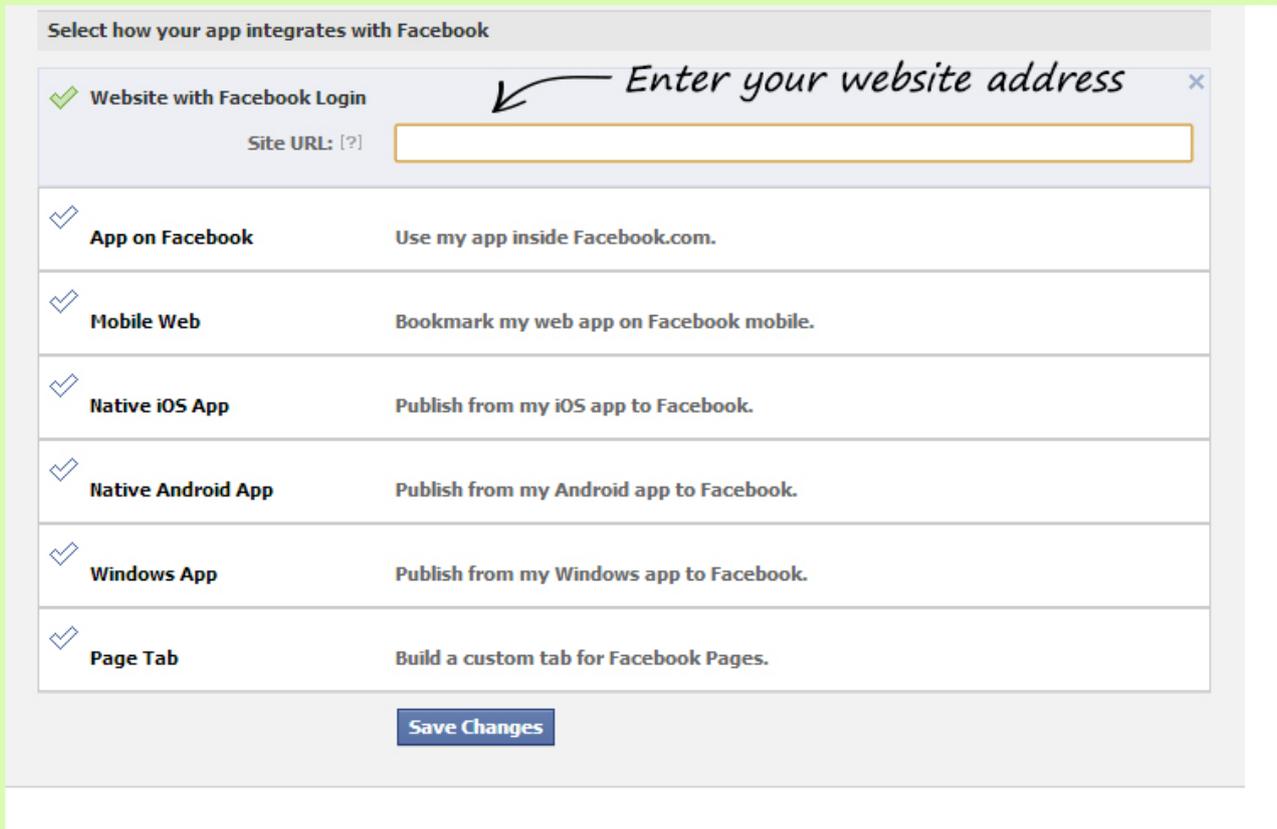

After that you will be provided with your **Application ID** and **Application Secret** which you need to copy and save – you will need them later to enter into corresponding fields on the module settings page.

The screenshot shows the Facebook Developer console interface for an application named "Bel". At the top left is the BELVG logo. The app's icon is a blue atom symbol. The app name "Bel" is displayed. Below the name, the "App ID" is 175796515952661 and the "App Secret" is c7cd9b19ea1d55f4d1479499b5ad194a, with a "(reset)" link next to it. A red dot indicates the app is in "Sandbox Mode", with a note that it is only visible to Admins, Developers, and Testers. A handwritten note "Copy and save your App ID Secret Key" with an arrow points to the App Secret field. Below this is the "Basic Info" section with several input fields: "Display Name" (empty), "Namespace" (empty), "Contact Email" (empty), and "App Domains" (with the placeholder text "Enter your site domains and press enter"). At the bottom of this section, "Sandbox Mode" is set to "Enabled" with a radio button. Below the "Basic Info" section is a grey bar with the text "Select how your app integrates with Facebook".

Also, enter your website address into the **Website with Facebook Login** field.

Select how your app integrates with Facebook

<input checked="" type="checkbox"/>	Website with Facebook Login	Site URL: [?] <input type="text"/>
<input checked="" type="checkbox"/>	App on Facebook	Use my app inside Facebook.com.
<input checked="" type="checkbox"/>	Mobile Web	Bookmark my web app on Facebook mobile.
<input checked="" type="checkbox"/>	Native iOS App	Publish from my iOS app to Facebook.
<input checked="" type="checkbox"/>	Native Android App	Publish from my Android app to Facebook.
<input checked="" type="checkbox"/>	Windows App	Publish from my Windows app to Facebook.
<input checked="" type="checkbox"/>	Page Tab	Build a custom tab for Facebook Pages.

[Save Changes](#)

Once you are ready with the settings click **Save changes**.

Now your Facebook App is created. **Congratulations!**

4. How to Configure

Now, go to your Prestashop admin panel, and we will show you how to configure the extension step by step.

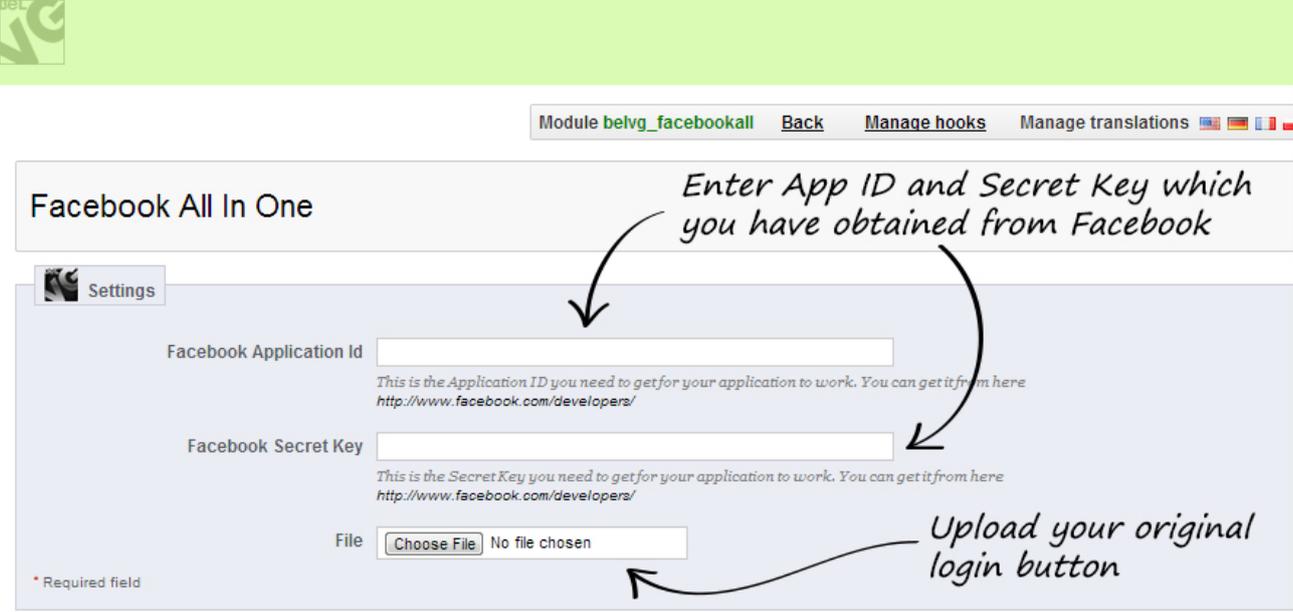

To view the extension settings, go to **Modules-> Modules ->Facebook all in One -> Configure**.

The module has a bunch of settings which need your attention to configure:

Settings

In this section you need to enter your Facebook **Application Id** and **Secret key** codes which Facebook has generated for your website.

You can also create and upload your original login button which will be used on your website to let customers sign into your website with their Facebook accounts.

Domain: ← Enter the name of the domain for which to show activities

Actions to Show: ← Specify types of actions to display

Height:

Width:

Maximum Age:

Show header

Position Left Right

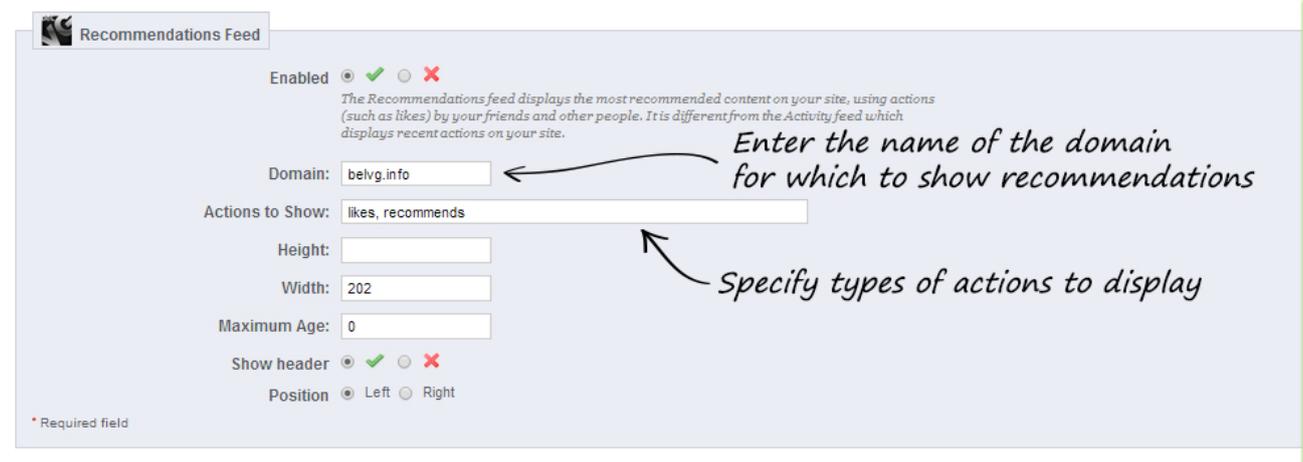

* Required field

Recommendations feed

This feature shows most recommended content of your website based on users' actions, such as likes and shares etc.

- **Enabled** – select this box to activate the button;
- **Domain** – enter the domain name for which to show activity;

- **Actions to show** – specify types of actions, separated by commas, which should be displayed in the activity feed;
- **Height** – set button height (in pixels);
- **Width** – set button width (in pixels);
- **Maximum age** – limit the created time of articles that are shown in the feed;
- **Show header** - show the "Recent Activity" header above the feed. Values are "true" or "false".
- **Position** – choose position of the plugin.

The screenshot shows the configuration interface for the 'Recommendations Feed' plugin. It includes the following fields and options:

- Enabled:** Radio buttons for 'Enabled' (checked), 'Disabled', and 'Deleted'.
- Domain:** Text input field containing 'belvg.info'. A handwritten arrow points to this field with the text: *Enter the name of the domain for which to show recommendations*.
- Actions to Show:** Text input field containing 'likes, recommends'. A handwritten arrow points to this field with the text: *Specify types of actions to display*.
- Height:** Empty text input field.
- Width:** Text input field containing '202'.
- Maximum Age:** Text input field containing '0'.
- Show header:** Radio buttons for 'Show header' (checked), 'No header', and 'Deleted'.
- Position:** Radio buttons for 'Left' (checked) and 'Right'.

A small asterisk and the text '* Required field' are visible at the bottom left of the configuration area.

Like box

Like box is a type of Like button which is applied only for Facebook business pages.

- **Enabled** – select this box to activate the button;
- **Facebook Page URL** – enter the URL of your Facebook page;
- **Height** – set button height (in pixels);
- **Width** – set button width (in pixels);
- **Color scheme** - choose color scheme;

The screenshot shows the 'Like Box' configuration panel. At the top, there is an 'Enabled' toggle with a green checkmark. Below it is a descriptive text: 'The Like Box is a special version of the Like Button designed only for Facebook Pages. It allows admins to promote their Pages and embed a simple feed of content from a Page into other sites.' The 'Facebook Page URL' field contains 'http://www.facebook.com/FacebookDevelopers'. The 'Height' field is empty, and the 'Width' field contains '202'. The 'Color Scheme' is set to 'light'. There are four rows of checkboxes: 'Show Friends' Faces', 'Show Posts', 'Show Header', and 'Show Border', each with three radio buttons (selected, checked, unchecked). The 'Position' is set to 'Right'. Handwritten annotations include a circle around the 'Height' and 'Width' fields with the text 'Set up layout position and configurations of your Like Box', and an arrow pointing to the 'Facebook Page URL' field with the text 'Enter your Facebook page URL'. A 'Required field' note is visible at the bottom left.

Once you are ready with the settings click Save and let your start enjoying all features which Facebook all in One module provides for your website.

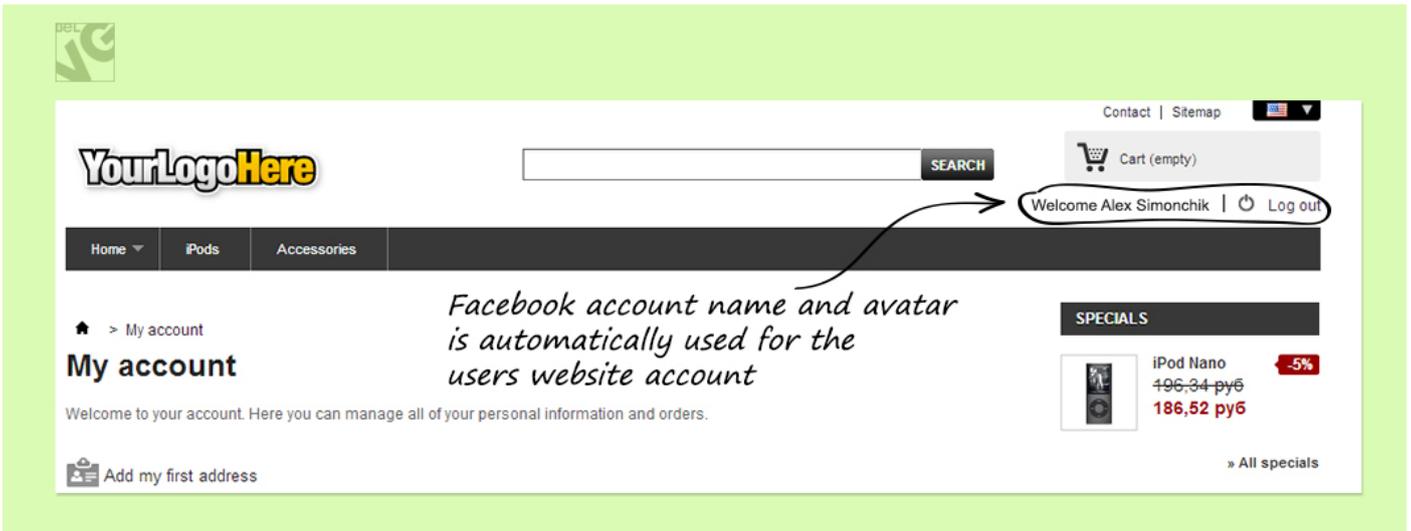

5. How to Use

It's time to get acquainted with **Facebook All in One** features and the ways customers may use them. We will visually review extension options and activities related to them. Eventually you will be able to see how your users' actions are mirrored on Facebook.

Customers will be able to log into your website right with their Facebook accounts. No additional actions or sign up registrations are required.

The image shows a screenshot of an e-commerce website interface. The website has a green header with the logo 'YourLogoHere' and a search bar. The main navigation menu includes 'Home', 'iPods', and 'Accessories'. A 'Login' button with a Facebook 'f' icon is highlighted with a blue circle and a black arrow pointing to it. A handwritten note in black cursive text says: 'With a single click your customers can log into your website right with their Facebook account. The Login button has the same appearance as default Facebook button'. The website content includes a 'TAGS' section with 'ipod', 'apple', and 'shuffle', a 'CATEGORIES' section with 'iPods', 'Accessories', and 'Laptops', a 'MANUFACTURERS' section with 'Apple Computer, Inc' and 'Shure Incorporated', and a 'SUPPLIERS' section with 'AppleStore' and 'Shure Online Store'. The main product area features a large image of an iPod Nano with a price tag of '196,84 py6' and a '-5%' discount, and a 'FEATURED PRODUCTS' section with four 'NEW' items. The right sidebar contains 'SPECIALS', 'OUR STORE(S)!', and 'CONTACT US' sections.

Once a user logs into your website with his Facebook account, his account name and avatar become automatically used on your website.

The Facebook **Like** and **Share** buttons are activated and available for all products in your webstore, so customers can Like and Share with their friends whatever product their like or find interesting, thus, bringing you more traffic and visitors.

Moreover, customers can leave their comments and impressions right below the product image.

The module will place a Facebook Page plugin on every page, so your visitors will be able to easily find and follow your business page on Facebook.

The screenshot shows an e-commerce website for iPods. The main content area displays a list of iPod products, including an iPod Nano and an iPod shuffle. A handwritten note with an arrow points to a Facebook plugin located in the bottom right corner of the page. The plugin is titled "Find us on Facebook" and features the Facebook logo, the text "Facebook Developers", a "Like" button, and a grid of profile pictures of people who like the page. The text "2,625,764 people like Facebook Developers." is visible above the grid. The plugin is circled in black.

The module also places a link to your Facebook business page on every page of your store
