## 1. Introduction to Filter by Features

**Prestashop Filter by Features** module has been designed to help you in managing products through the administration panel. The extension provides a simple, yet a very convenient solution that allows you to sort products in the Catalog section by their features.

### Key features:

- Products can filtered by features;
- Filter by multiple criteria at a time;
- Simple to use, no configurations required.

### Overall Information

This new module is a new management tool that should simplify and facilitate your work with products. Now in your administration panel you have an extra condition that allows you to quickly filter all available products by their features. With several clicks you will be able to sort out and get the list of products that you need.

The module is very easy to install and use. Once installed, it does not require any additional configurations or tweaking of settings and is already available for use.

## 2. How to Install and Deactivate

### How to Install

1. Set 777 or 0777 on the folders: **'/modules/'**

**Important! Change all permissions back after installation.**

2. Go to **Modules** -> **Add a module from my computer** -> choose the file (.zip) -> upload this module. Choose module in section **Front Office Features** and install it.

3. Go to **Advanced Parameters** -> **Performance** -> click the **Clear Smarty Cache** button

### How to Deactivate

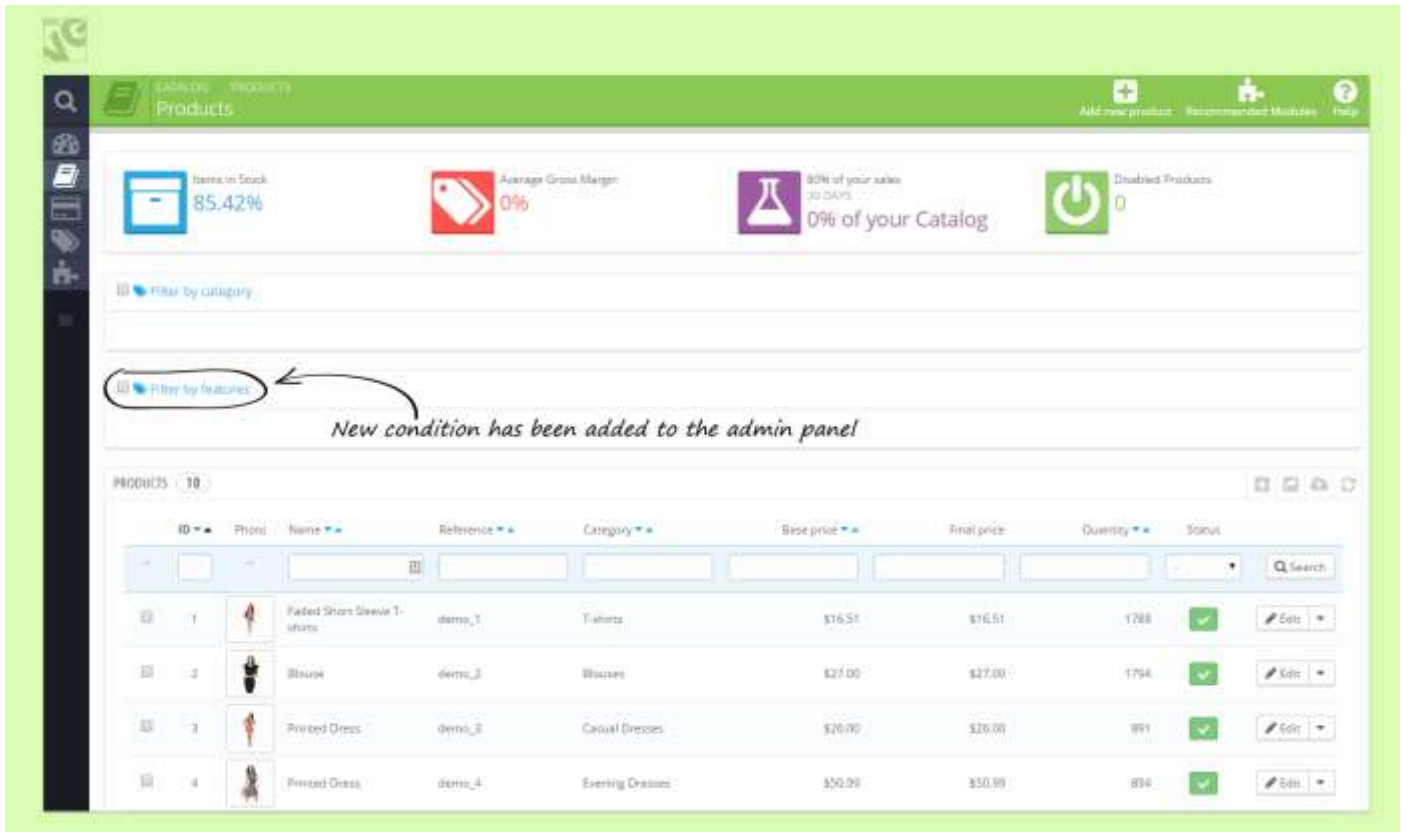

Click the button **Disable** in **Modules** -> **Front Office Features**.

To remove the extension form the server, press **Delete** in **Modules** -> **Front Office Features**.

### 3. How to Configure

As soon as the module is installed it is ready to use and does not require any additional tweaking.

To start using it, log into the administration panel and go to **Catalogs - Products** and you will see that new condition have already been added to that section.

Now as soon as you click any of these boxes and choose to filter by a certain condition (or several conditions), the module will quickly sort the products and will provide you with the list of results that match the specified criteria.

You can filter your products by a specific feature or several features at once and show products with all selected features.

The screenshot shows a product management interface. On the left, there is a sidebar for filtering products by features. The sidebar is organized into several categories: Dimensions (Height, Width, Depth, Weight), Compositions (Cotton, Elastic, Leather, Polyester, Silk, Straw, Suede, Viscose, Wool), Styles (Basic, Casual, Classic, Dressy, Gvly, Military, Rock), and Properties (Colorful Dress, Maxi Dress, Midi Dress, Short Dress, Short Sleeve). A handwritten note with an arrow points to the filter sidebar, stating "Products filtered by a set of feature".

At the top right of the interface, there are buttons for "Add new product", "Recommended Modules", and "Help". Below the filter sidebar, there are buttons for "Collapse All", "Expand All", "Check All", "Uncheck All", and "Apply Filter".

Below the filter sidebar, there is a table of products. The table has columns for ID, Photo, Name, Reference, Category, Base price, Final price, Quantity, and Status. The table contains three rows of product data.

ID	Photo	Name	Reference	Category	Base price	Final price	Quantity	Status
1		Faded Short Sleeve T-shirt	demo_1	T-shirts	\$16.51	\$16.51	1788	✓ Edit
2		Blouse	demo_2	Blouses	\$27.00	\$27.00	1794	✓ Edit
3		Printed Dress	demo_3	Casual Dresses	\$26.00	\$26.00	881	✓ Edit
