1. Introduction to Pre-order and Waiting List

With **Prestashop Pre-order and Waiting List** module customers are allowed to pre-order & pay for unavailable products in advance and subscribe to the waiting list to be notified when products appear in stock. Options of pre-ordering products and adding them to the wait list increase your sales and leave your customers satisfied with your service.

Key features:

- Pre-ordering and subscribing to the waitlist;
- Countdown to the date when the product will be available;
- 'Pre-order' or 'Notify me when back in stock' buttons for absent products;
- Customer can choose pre-order and pay in advance;
- Notifying about order status change;
- My Waitlist tab in a customer account with awaited products;
- Multistore & Configurable products support.

Overall information

Pre-order and Waiting List gives you a possibility to monitor most awaited out of stock products, including the configurable ones. The module adds 'Pre-order' or 'Notify me when back in stock' buttons to unavailable products. As soon as the product status is changed, email notifications will be sent to all waiting customers.

2. How to Install and Deactivate

How to Install

1. Set 777 or 0777 on the folders: '/modules/'

Important! Change all permissions back after installation.

2. Go to **Modules** -> **Add a module from my computer** -> choose the file (.zip) -> upload this module. Choose module in section **Front Office Features** and install it.

3. Go to Advanced Parameters -> Performance -> click the Clear Smarty Cache button

How to Deactivate

Click the button **Disable in Modules -> Front Office Features**.

To remove the extension form the server, press Delete in Modules -> Front Office Features.

3. How to Configure

Log in to the admin panel, and we will show you how to configure the extension step by step.

Transfer to Modules -> Pre-Order Products -> Configure to view extension settings.

When preordered product is again available, the order status will be automatically changed from preorder to previous one.

How to setup cron job To send reminders you have 2 possibilities. You can enter the following urls in your browser http://site_url/modules/belvg_preorderproducts/controllers/cron.php

You can set a cron's task (a recursive task that fulfills the sending of reminders) First reminder: 0 * * * * php -f /path_to_your_prestashop/modules/belvg_preorderproducts/cron.php

How to configure a cron task?

- On your server, the interface allows you to configure cron's tasks.
- If your server does not have an interface, you can contact a developer

4. How to Use

It's time to get acquainted with **Pre-order and Waiting List** features and the ways customers take benefit of them.

'Add to cart' button for out of stock products is not available to customers on Home page.

Standard 'Add to cart' button is replaced by 'Notify me when back in stock' button in case if customer is allowed to add product to his waitlist.

	Pice ore	lar the product

The notification that product is added to waitlist is displayed in **My waitlist tab** in customer account. Here customer can view product status and transfer to product page by direct link.

Also user has possibility to delete waited product from his waitlist immediately.

Do you have questions about extension configurations? Contact us and we will help you in a moment.
