3.	How to Configure	. 5

## **1. Introduction to Extended Footer**

Dress up your footer with Prestashop Extended Footer module. Configure footer size, choose background color and/or picture and use WYSIWYG editor to create blocks with any content – text, lists, tables, links, video, audio and more. Drag these blocks to position them just the way you want it. Check out the footer preview and upload it on the front-office instantly.

#### Key features:

- Advanced footer view
- Configuring footer size and background
- Footer borders options
- Creating blocks and positioning them inside the footer
- Live footer preview
- WYSIWYG blocks content editor

#### **General information**

Construct an informative footer and edit it easily with **Prestashop Footer Extended** module. Create blocks with eye-popping graphics, snappy typography or well-written text in a WYSIWYG editor and drag them around the footer to use the space smartly. Check if everything's OK on the preview and upload a newly created footer on the front-office.

## 2. How to Install

1. Set 777 or 0777 on the folders: '/modules/'

Important! Change all permissions back after installation.

- Modules -> Add a module from my computer -> Choose the file (footer.zip) -> Upload this module.
   Choose module in section "Front Office Features" and install module
- Preferences -> Performance -> Smarty-> Force compile -> Yes
   Preferences -> Performance -> Smarty-> Cache: No

## How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the module from the server, press **Delete** in Modules -> Front Office Features.

That's all! Enjoy the **Extended Footer** performance.

#### **Disclaimer!**

It is highly recommended to backup your server files and database before installing this module. No responsibility can be taken for any adverse effects installation or advice may cause. Recommended you install on a test server initially to carry out your own testing.

## 3. How to Configure

Log in to the back-office, and we will show you how to configure the module step by step. To view module settings, go to **Modules -> Extended Footer.**
