1. Introduction to One Step Checkout

The default Prestashop checkout process includes five steps that make checkout very tedious and may lead to shopping cart abandonment. Prestashop One Step Checkout combines all steps into all-in-one form, allowing your customers to enjoy fast and easy purchase. Simplify the checkout process, and you will increase your online sales.

Key features:

- Checkout on a one page
- No page reloading
- Ability to create customer account upon placing the order
- Allows checking out as guest
- The cart is right on the checkout page
- Deleting items from the cart instantly

Overall information:

Complicated checkout process with many forms to fill in can make customers run away and increase cart abandonment. Prestashop One Step Checkout offers an optimized and simplified checkout for your customers' positive shopping experience.

The module shortens the process into one single page. Logged in customers already have their information on the page; they need to make just a few clicks to confirm the order.

In addition, customers can see their carts displayed on the same page and instantly delete items without referring to carts directly.

2. How to Install

1. Set 777 or 0777 on the folders: '/modules/'

2. Set 777 or 0777 on the folders: '/override/controllers/'

Important! Change all permissions back after installation.

3. Modules -> Add a module from my computer -> Choose the file (onepagecheckout.zip)
-> Upload this module.

Choose module in section "Front Office Features" and install module

4. Preferences -> Performance -> Smarty-> Force compile -> Yes
Preferences -> Performance -> Smarty-> Cache: No

For advanced users.

Note that the module replaces standard OrderOpcController using the mechanism of override; it gives an opportunity to leave the default file Prestashop unchanged, which will allow you to update the version without loss of functionality and compatibility.

However, if you're already using a modified OrderOpcController, then most likely you may need to make changes to the extension, for this purpose contact support.

How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension from the server, press **Delete** in Modules -> Front Office Features.

That's all! Enjoy the **One Step checkout** performance.

3. How to Configure.

Log in to the admin panel, and we will show you how to configure the extension step by step.

Navigate to **Preferences** and in **Checkout process type** dropdown menu choose *One page checkout*.

The screenshot displays the 'Preferences' configuration page in PrestaShop. It features several settings sections, each with a green checkmark icon and radio buttons for 'Yes' or 'No'. The 'Checkout process type' section is highlighted with a red arrow pointing to the 'One page checkout' option in the dropdown menu. A yellow callout box with the text 'Choose one page checkout type' is positioned next to the dropdown. The other settings include 'Increase Front Office security', 'Back Office help boxes', 'Enable guest checkout', 'Terms of service', and 'Conditions of use CMS page'.

Increase Front Office security ☒ Yes ☐ No
Enable or disable security token in the Front Office in order to improve PrestaShop's security

Back Office help boxes ☒ Yes ☐ No
Enable yellow help boxes which are displayed under form fields in the Back Office

Checkout process type ☒ Standard (5 steps) ☐ Standard (5 steps) ☒ One page checkout
process type as either standard or one page checkout

Enable guest checkout ☒ Yes ☐ No
Your guest can place an order without registering

Terms of service ☒ Yes ☐ No
Require customers to accept or decline terms of service before processing the order

Conditions of use CMS page
Choose the CMS page for your Conditions of use

After selecting the necessary settings, please don't forget to press *Save* button.

This is very simple, isn't it?

4.How to Use

It's time to get acquainted with One Step Checkout features and the ways customers take benefit of them.

Standard checkout process takes 5 steps. The customer have to complete each page before go the next one. Default checkout process is very cumbersome and it may lead to shopping cart abandonment.

The collage displays five key steps of the checkout process:

- Step 1:** Shopping cart summary showing products (e.g., iPod touch, iPod shuffle) and their prices, with a 'Next' button.
- Step 2:** Account creation and login options, including fields for email and password.
- Step 3:** Address selection screen, allowing users to choose a delivery address from a list or add a new one.
- Step 4:** Shipping and payment terms, including a table for carrier information and a 'Next' button.
- Step 5:** Payment method selection screen, showing options like 'Pay by cheque' and 'Pay by bank wire'.

One Step Checkout helps customers to have checkout process much simpler and faster.

Logged customer doesn't need to fill in address information, but if he may add a new address or modify the existing one. To complete checkout process customer just needs to agree terms of service, choose payment method and click *I confirm my order* button one time.

Besides, customers can see all their purchases on checkout page. And even more, buyers can instantly delete items they don't want to buy without going back to the cart.

The screenshot shows a three-column checkout interface. The first column, '1. ADDRESSES', contains fields for delivery and billing addresses, both pre-filled with 'Mary Draw' and 'London'. The second column, '2. DELIVERY METHODS', includes terms of service, a delivery method selection area, a gift-wrapping option, and a message field. A yellow callout box with the text 'The cart with "instant delete" button' points to a trash icon in the 'DELIVERY METHODS' section. The third column, '3. REVIEW YOUR ORDER', displays the shopping cart contents, a summary of costs, and a voucher field. The cart table shows one item: 'iPod shuffle' with a price of \$66.05. The summary shows a subtotal of \$73.05 and a total of \$73.05. A 'Continue shopping' button is at the bottom.
