# **1. Introduction to Product Tabs**

The Product Tabs extension is a perfect way to improve product description on your Prestashop store. The default Prestashop product page layout allows having only two tabs for product description, which sometimes may not be sufficient enough to let you highlight all advantages and peculiarities of your products. The Product Tabs module lets you add different types of additional information and neatly arrange product description, add extra text blocks, product images, videos and even upload documents that you may want your customers to be able to download.

### Key features:

- Add unlimited number of tabs;
- Create **product specific and global tabs**: you may create unique tabs that will be available only for some specific products or general tabs that will be available for all goods in your store;
- Create custom rules to display specific tabs only for selected manufacturers, categories or groups of customers;
- Different types of tabs supported: product description, contact form, simple content block, attachments, videos, images, etc.;
- WYSIWYG-editor lets you easily create and modify the content of your tab: add images, video files, tables, bold and italic text, create ordered and unordered lists, etc.
- Use drag-and-drop to reorder multiple tabs in the list;

- Upload **PDF and DOC files:** upload a document file in your admin dashboard and customers will be able to download it from the tab;
- Customize tab background colors and text styles.

### **Overall information**

Good product description is one of the keys to successful selling. The way you present your goods, the information that is provided as well as additional media support can quickly turn some hard sell product into a real best seller.

Unfortunately, the default Prestashop means of product presentation are quite scarce and give very few possibilities for customization. Neither you can create individual rules of product description for several products or product categories. But using the Product Tabs module you can easily overcome this problem and supply each product on your store with additional text, image and supporting video material.

The Product Tab module allows you create unlimited number of additional tabs on each product page and arrange them either as vertical or horizontal orientation or stack as accordion.

The module supports various types of tabs, so you can add not only simple text blocks, but also unique product descriptions, contact forms, product details or attach files that your users will be available to download right from the page. There is no limit for the number of tabs that you can create.

The extension also allows you create custom rules to display different types of tabs for different user groups.

# 2. How to Install

- Go to Modules → Modules and Services → upload the module on the server using the Upload a Module button.
- In the dropdown list choose Product Page → find Product Tabs on the opened page → click Install.
- Go to Advanced Parameters → Performance → Disable cache → click the Clear Smarty Cache button.
- Once you finish configuring and creating your product tabs go back to Advanced Parameters → Performance and enable cache back.

# How to Deactivate

- 1. Go to Modules → Modules and Services.
- 2. Switch to the Installed Modules tab.
- Select the Product Tab module in the list → in dropdown list select the Uninstall option.
- Once the module is uninstalled go to Advanced Parameters → Performance → click the Clear Smarty Cache button.

# 3. How to Configure

**Note:** The Product Tab module has been developed and tested only on the default Prestashop theme, so the setting descriptions and screenshots provided in this manual may differ from those you may see if using some custom theme.

### **Configuring General Settings**

Once the module is installed you can start with configuring general settings: selecting color, styles and types of tabs that you wish to display on your product pages.

Log into your admin panel and go to **Product Tab**  $\rightarrow$  **Product Tab Settings**. The settings menu will offer the following options to configure:

- Product tab type: select to add vertical, horizontal or accordion tabs;
- Background color tabs: select color for the background tabs;
- Font color tabs: specify font color;
- Background color of selected tabs: choose color for selected tabs;
- Font color of selected tabs: specify font color for selected tabs.

		and use colors suitable for your store's style

## **Creating Global Tabs**

Global tabs can be available either for all products in your store or only for selected categories, manufacturers or suppliers.

To create a global tab go to the **Product Tab → Global Product Tabs** section and click the **Add New** button.

There you will have to set up the following options:

• **Tab Type:** you can choose to add a contact form, text block, description or product details.

**Product Description** and **Product Details** are default Prestashop tabs which are automatically added to the module, therefore the content for these tabs should be managed under the respective menus in the admin settings:

- Product Description: Catalog → Products → enter the product edit menu
   → Basic Settings tab → Description tab.
- Product Details: Catalog → Products → enter the product edit menu →
   Basic Settings tab → Features.

The **Contact Form** tab is using a predefined template which can be customized by editing the template source code.

- **Title**: give title to the new tab the given name will be used right on your frontend;
- **Content:** enter the required text. You can modify the font style, insert images, videos or tables.
- **Category:** choose categories where the new tab will be displayed.

Quick Access - Q - Search

	2	Contact Form					

Then configure the next options:

- **Tab type:** you can choose to add vertical, horizontal or accordion tabs. The module also lets you specify the type of content you wish to display: either a simple text block or a contact from, description page or some product attachments.
- Title: the name will be used on the frontend as the tab header.
- **Content:** enter the required text. You can modify the font style, insert images, videos or tables.

• **Group access:** create a custom rule and select the type of users that will be able to see this tab.

### How to make tabs with attachments

The Product Tab module allows creating tabs with attachments: you can upload a PDF, DOC or other documents which your customers will be able to download from your web-store.

To upload a file to a product page go to **Catalog**  $\rightarrow$  **Products**  $\rightarrow$  enter the edit menu of a product  $\rightarrow$  switch to the **Options** tab - click the **Attach a New File** button.

Where do you want your product to appear?	
Everywhere	
Available for order	b only (not sold in your retail store)
Tags	
Use a comma to create separate tags. E.g.: dr	ress, cotton, party dresses.
Tags facilitate the product search for curves	ustomers using the search bar. Read more
Condition & Defense	
Condition & References	
Condition 2	Display condition on product page
New	Display condition on product page
ISBN D	EAN-13 or IAN barcode
	~
UPC barcode 💽	
Customization	
Customers can personalize the product by enter	tering some text or by providing custom image files.
+ Add a customization field	
Attached files	y on the product page (instructions, manual, recipe, etc.).
Attached files Add files that customers can download directly	
Attached files Add files that customers can download directly There is no ottachment yet.	
Attached files Add files that customers can download directly There is no attachment yet.	
Attached files Add files that customers can download directly There is no attachment yet.	

Next, switch to the **Modules** tab and click **Add a Product Tab.** 

### In the Tab Types dropdown select Product Attachments.

		Tab types: 🝞	
Add a produ	ct tab	Vertical	
New pr	roduct tak	)	
product_a	attachments		
Title*			
Title			
Title			
Title	ID	Group name	
	ID 1	Group name Visitor	
Title	ID 1 2	Group name Visitor Guest	
	ID 1 2 3	Group name Visitor Guest Customer	
Title	ID 1 2 3	Group name Visitor Guest Customer	

Give name to the tab and then select the groups of customers that will be able to download that file from your store.

**Note:** The attachment tabs are product-specific, so you can create individual attachments for each separate product on your store. But it is possible to control groups of attachments on global scale: to enable/disable attachments for specific product categories, manufacturers or suppliers.

To create a global product attachments rule go to **Product Tab**  $\rightarrow$  **Global Product Tabs**  $\rightarrow$  click **Add New**.

In the **Product Type** dropdown choose Product Attachments.

Give name to the attachment tab.

Choose **Category**, **Manufacturers** and **Suppliers** for which this new global attachment tab will be enabled.

Finally, select the groups of customers that will be able to see the global tab on your store in the specified categories.

# 4. How to Use

It's time to get see how the new tabs look like on the frontend. As soon as you set up any product tab and click to activate it — the respective tab will appear for the specified product or all products under the selected category.

You can arrange your product tabs in different ways.

### Horizontal:

### Vertical:

### Accordion view:

Apart from simple text block you can generate other types of tabs, such as **contact forms**:

# Product descriptions:
