1. Introduction to Size Assistant

Prestashop Size Assistant allows creating visual and clear size guides for groups of products or particular items. Perfect for apparel stores, the module adds the Detailed Dimensions button to product pages. In the Dimensions window table of sizes for this product as well as auxiliary images are displayed. Tables are easily created in the back-office and, in fact, upgrade standard Prestashop attributes.

Key features

- Size assistant on products pages
- Easily created size guides
- Adding images to size tables
- Size guides for groups of products and single items
- Easy-to-use tables constructor
- Possibility of adding several tables to a single product
- Unlimited number of columns and lines in tables

Overall information

Standard sizes take into account the combinations of body measurements of the general population. Not everyone, however, knows the exact dimensions, such as horizontal and vertical torso or sleeve measurements, for this or that size. Moreover, sizing systems differ and depend on a country the customer is located in. For example, men's sports shirts M size in the US corresponds to 39/40 in EU. Size Assistant allows users to receive all information on sizes and dimensions as quickly as one simple click.

Create custom attributes and associate the existing ones, constructing, thereby, size guides. Design a Detailed Dimensions window with images – insert, for instance, clothes outlines with designations to clarify how to measure garment.

2. How to Install and Deactivate

How to Install

1. Set 777 or 0777 on the folders: '/modules/'

Important! Change all permissions back after installation.

2. Modules -> Add a module from my computer -> Choose the file (belvg_sizeassistant.zip) -> Upload this module. Choose module in section "Front Office Features" and install module

3. Preferences -> Performance -> Smarty-> Force compile -> Yes

Preferences -> Performance -> Smarty-> Cache: No

How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension from the server, press **Delete** in Modules -> Front Office Features.

3. How to Configure

Log in to the back-office, and we will show all you may need to configure.

Let's first create a standard Prestashop attribute. In Size Assistant, the standard attribute you choose is the first column in the size guide. You'll add custom columns with respective dimensions, sizes in other units of measurement or whatever else later on.

Navigate to **Catalog** → **Attributes and Values**.

Catalog > Attributes and Values

Page 1 / 1 | Display 50 / 5 result(s) *Add new standard Prestashop attributes and values* [Reset] [Filter]

ID	Name	Values count	Position	Actions
1	Disk space	9		[edit] [delete] [add]
2	Color	10	▼▼	[edit] [delete] [add]
3	ICU	2	▼▼	[edit] [delete] [add]
4	Boots size	8	▼▼	[edit] [delete] [add]
6	Size	5	▲	[edit] [delete] [add]

[Delete selected]

Click the **Add new Attributes** button.

The screenshot shows a web interface for configuring attributes. The form is titled "Attributes" and contains the following fields and options:

- Name:** Boots size
- Public name:** Size (with the subtitle "Group name displayed to the customer")
- URL:** (with the subtitle "Specific URL format in block layered generation")
- Meta title:** (with the subtitle "Specific format for meta title")
- Indexable:** A radio button is selected, with a green checkmark icon and a red X icon. The subtitle is "Use this attribute in URL generated by the layered navigation module".
- Attribute type:** Drop-down list (with the subtitle "Choose the type of the attribute")

A legend at the bottom left indicates that an asterisk (*) denotes a required field.

Name the attribute and define the public name. Select the type the attribute will be displayed in form of. Save your configuration.

Now that you have created standard attributes, you can upgrade any of them and create a size guide.

Go to **Modules** -> **Belvg Size Assistant**. Click **Add new Group**.

Create the group

Groups

Name:

Image:

Insert the image →

File size: 29.045kb

Select the attributes type →

No file selected
Upload image from your computer

Image width:

Image height:

Attributes type:

If necessary, define the image size

Name the group. Add the explanatory image and define its size, if necessary. Select the attributes type you want to expand with additional dimensions. Save the group.

Click **Add new Attributes**.

The screenshot shows a configuration window titled "Values" with a light blue background. At the top left, there is a small logo. The main content area is divided into two sections. The first section, labeled "Group:", has a dropdown menu set to "T-Shirt Size (based on Size)". Below this, there is a note: "Choose the group of the attribute". The second section, labeled "Attributes:", contains two attribute groups. The first group is "[A] - Overall length" with a unit dropdown set to "en". It lists five values: 0 (S), 70 (M), 72 (L), 74 (XL), and 75 (XXL). The second group is "[B] - The width of the sh" with a unit dropdown set to "en". It lists five values: 0 (S), 42 (M), 45 (L), 46 (XL), and 48 (XXL). Handwritten annotations in black ink are present: "Select the group" with an arrow pointing to the "Group:" dropdown, and "Define the attributes" with an arrow pointing to the "Attributes:" section.

Select the group you want to set attributes for. In the Attributes area you can see the fields corresponding with the standard attributes you previously set and the first title field. Fill them in with the required data to create the table.

Finally, associate newly created tables with products. In order to do this, go to **Catalog -> Product** and **Edit** the product you want to add the table to the page of. Select the **BelVG Size Assistant** tab.

Size Assistant

Group T-Shirt Size
 Product is measured individually

	[A] - Overall length	[B] - The width of the shoulders	[C] - Width of chest	[E] - Width at the bottom	[F] - Sleeve Length
S	0	0	0	0	23
M	70	42	50	50	23
L	72	45	52	52	25
XL	74	46	55	55	26
XXL	75	48	59	59	27

Tank Top Size
 Product is measured individually

	[A] - Overall length	[B] - The width of the shoulders	[C] - Width bust	[D] - Width waist	[E] - The width at the bottom	[F] - Longueur manche
S	58	36	44	39	39	61
M	59	38	47	40	41	63
L	64	40	48	41	42	67
XL	68	42	50	42	43	70
XXL	72	45	53	45	46	74

Shorts Size
 Trousers Size

Select the group name to expand the table. Select **Product is measured individually** to activate it and edit it. “Product is measured individually” message will be displayed. You can add several tables to a single product.

4. How to Use

A Detailed Dimensions button appears on the front end.

On click, the window with the size guide appears. It includes the image and the sizes table.

Size assistant on the front end

	[A] - Waist	[B] - Total length	[C] - Inside leg length measured from the step	[D] - Width of legs in thigh measured at a height of step	[E] - The width of the bottom leg
S	34	52	27	26	28
M	37	53	27	26	30
L	40	54	27	28	32
XL	42	54	27	29	33
XXL	44	55	27	29	36
