## 1. Introduction to Static Blocks

Change your Prestashop template easily and instantly. Insert fully customized static blocks in any place of any page of your store. Edit the blocks in the WYSIWYG editor. Create and add any content type your heart desires. Simple configuration and intuitive navigation allows developing, inserting and modifying blocks without special knowledge of front end development.

### Key features:

- Fully customized static blocks
- Block content created in the WYSIWYG editor
- Placing static blocks anywhere in the pages
- Compatibility with Multi Store and Multilanguage stores
- Easy blocks management

### Overall information

Of all Prestashop features, static blocks are the most useful for your front end. BelVG Prestashop Static Blocks module helps you enhance your store and update it easily. Easy-to-use WYSIWYG editor allows creating any content including text, pictures, links, videos and other media.

Limitations of how you can use these blocks are only imposed by the admin's imagination - discount banners and coupons, policies and store info, video advertising and much more. Manage blocks in the back-office – enable and disable, add new and edit the existing ones. Handling regularly updated content has never been easier!

## 2. How to Install and Deactivate

### How to Install

1. Set 777 or 0777 on the folders: '/modules/'

**Important! Change all permissions back after installation.**

2. Modules -> Add a module from my computer -> Choose the file (staticblocks.zip) -> Upload this module. Choose module in section "Front Office Features" and install module

3. Preferences -> Performance -> Smarty-> Force compile -> Yes

Preferences -> Performance -> Smarty-> Cache: No

### How to Deactivate

Click the button **Disable** in Modules -> Front Office Features.

To remove the extension from the server, press **Delete** in Modules -> Front Office Features.

### 3. How to Configure

Log in to the back-office, and we will show all you may need to configure.

Navigate to **Modules** → **Belvg Static Blocks**.

*Module configuration*

Modules > Belvg Static Blocks

Page 1 / 1 | Display 50 / 4 result(s)

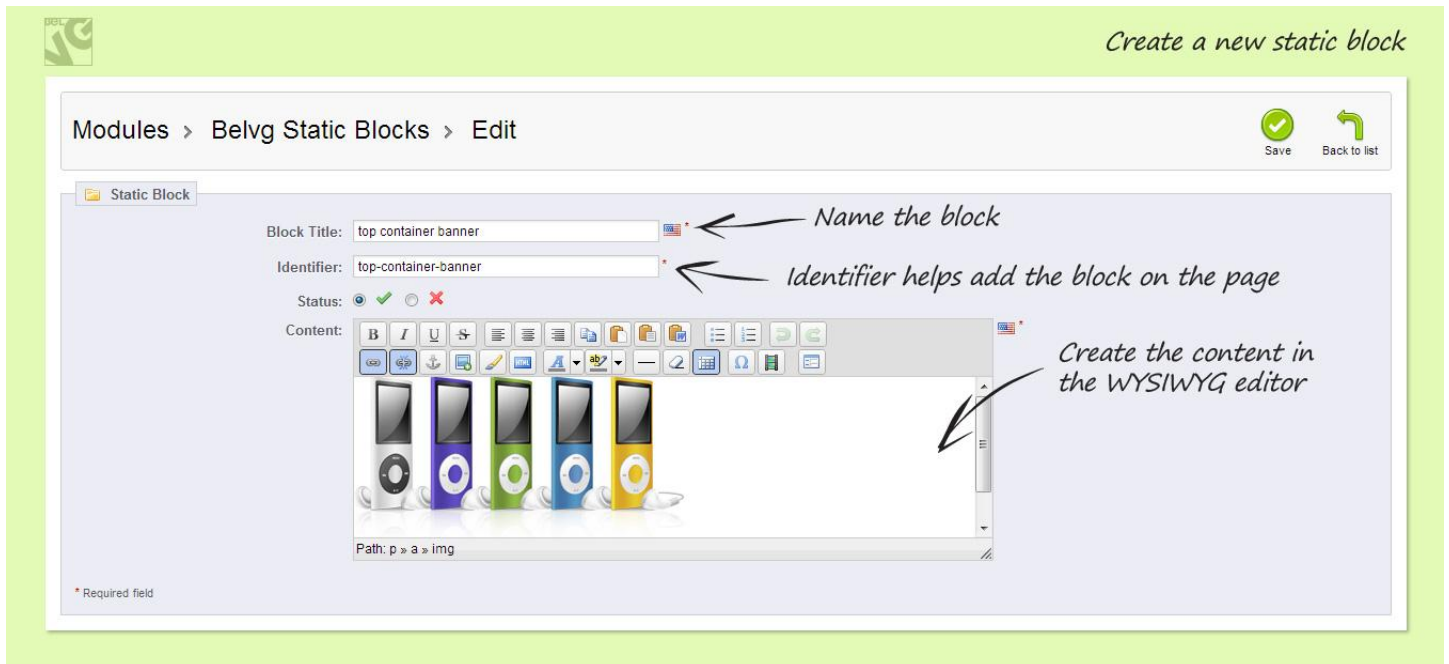

ID	Block Title	Identifier	Status	Date Created	Last Modified	Actions
2	banner	banner	✓	01/28/2013	01/28/2013	 
3	top container banner	top-container-banner	✓	01/28/2013	01/28/2013	 
4	top container text	top-container-text	✓	01/28/2013	01/28/2013	 
5	Block	sblock	✓	01/28/2013	01/28/2013	 

*Add a new block* → 

*Edit and delete blocks* → 

Here you can see the list of all your static blocks. Click the **Edit** or **Delete** icons to perform the respective actions.

Click the **Add new** button to create a new block.

In the **Block Title** field, name the block. This name will be displayed in the blocks list.

In the **Identifier** field, enter the identifier. It is used to add the block on the page.

In the **Status** area, select the tick box to enable the block and the cross box to disable it.

In the **Content** area, use WYSIWYG editor to create the content of your block. Feel free to add text, links, images, audio, video, etc.

To add a block to the page, open the *\*tp/* file of the respective page in the editor. Insert the following code

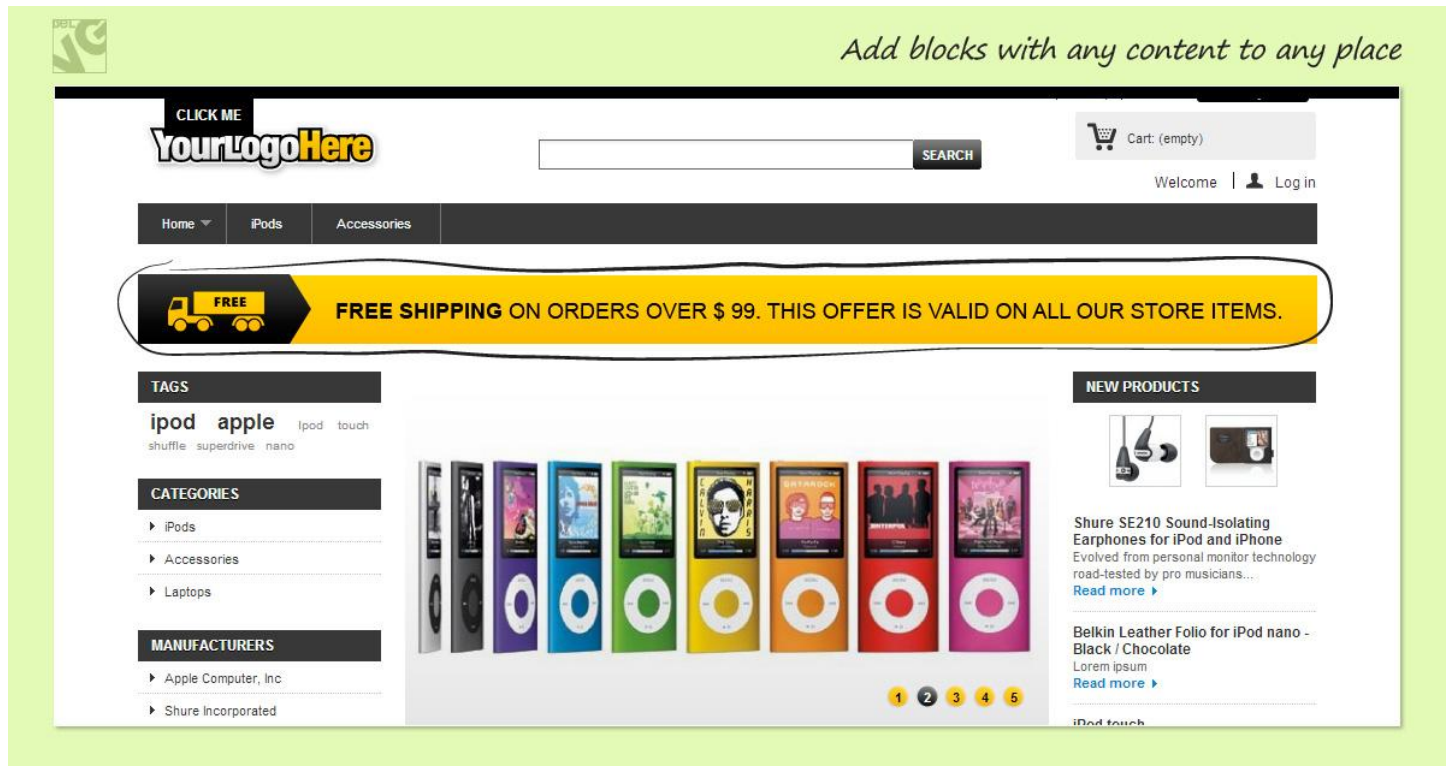

```
{getBelvgBlockContent id="block_identifier"}
```

wherever you want the block to appear. Instead of **block\_identifier**, enter the identifier label you've created for the block.

## 4. How to Use

Static Blocks appear on the front end.
