## 1. Introduction to Stickers & Labels

Add configurable stickers to any products both on home page, product and catalog page! With the **Stickers & Labels** module, you will be able to upload your own stickers and move them around the picture.

### Key features:

- Applying stickers to any products;
- Displaying stickers in the catalog, product and home page;
- Uploading any number of stickers for one product;
- Uploading own images;
- Changing sticker position on the product picture easily.

### Overall Information:

Apply configurable stickers to any products. Special labels are displayed in the catalog, search, home page and product view! Upload a label, set its position on the picture and select the products to apply it to.

Stickers & Labels Prestashop module is simple and comprehensive. It can be used in a variety of ways informing your customers about different product peculiarities and special offers.

Please notice, that this module was previously named Prestashop Stickers Pro.

## 2. How to Install and Deactivate

### How to Install

1. Set 777 or 0777 on the folders: '/modules/'

**Important! Change all permissions back after installation.**

2. Modules -> Add a module from my computer -> Choose the file (belvg\_stickerspro.zip) -> Upload this module. Choose module in section "Front Office Features" and install module
3. Preferences -> Performance -> Smarty-> Force compile -> Yes  
Preferences -> Performance -> Smarty-> Cache: No

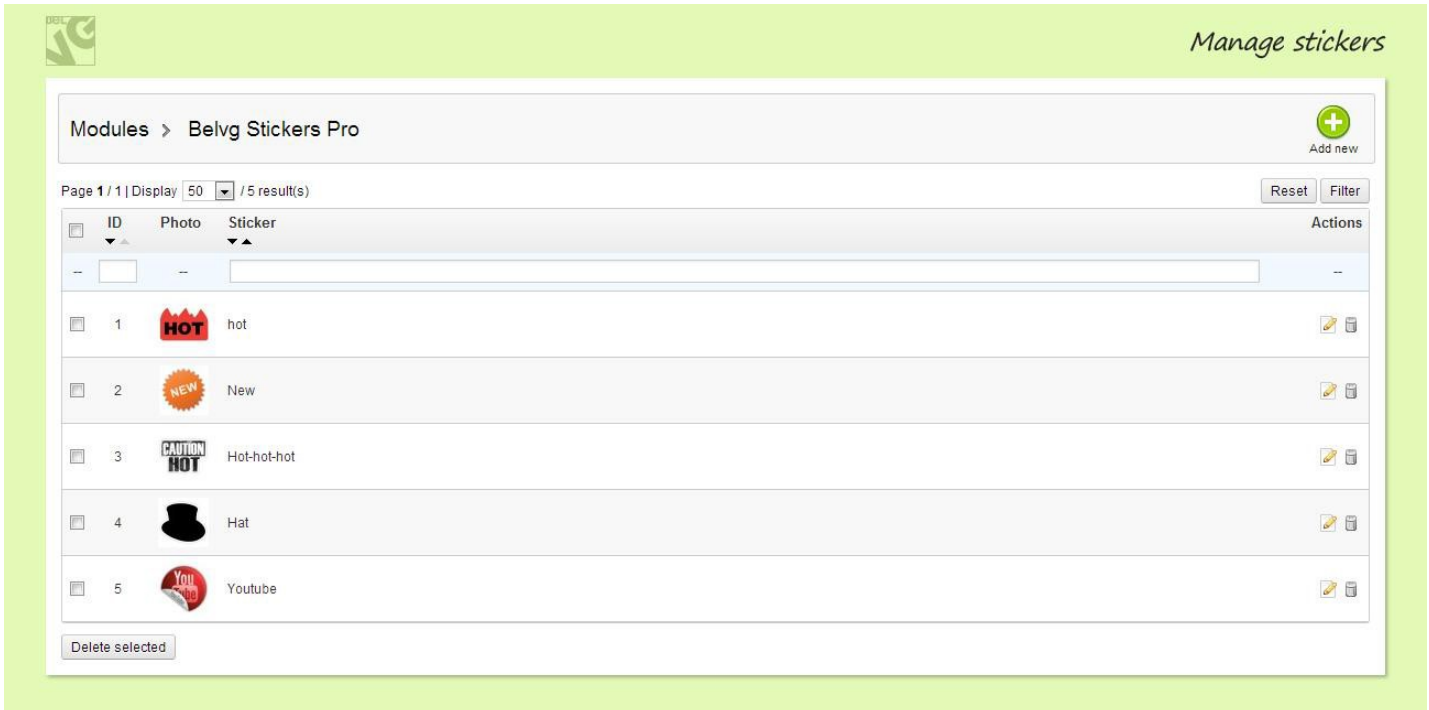

### How to Deactivate

Click the button Disable in Modules -> Front Office Features.

To remove the extension from the server, press Delete in Modules -> Front Office Features.

### 3. How to Configure

Manage stickers in Modules -> Belvg Stickers Pro.

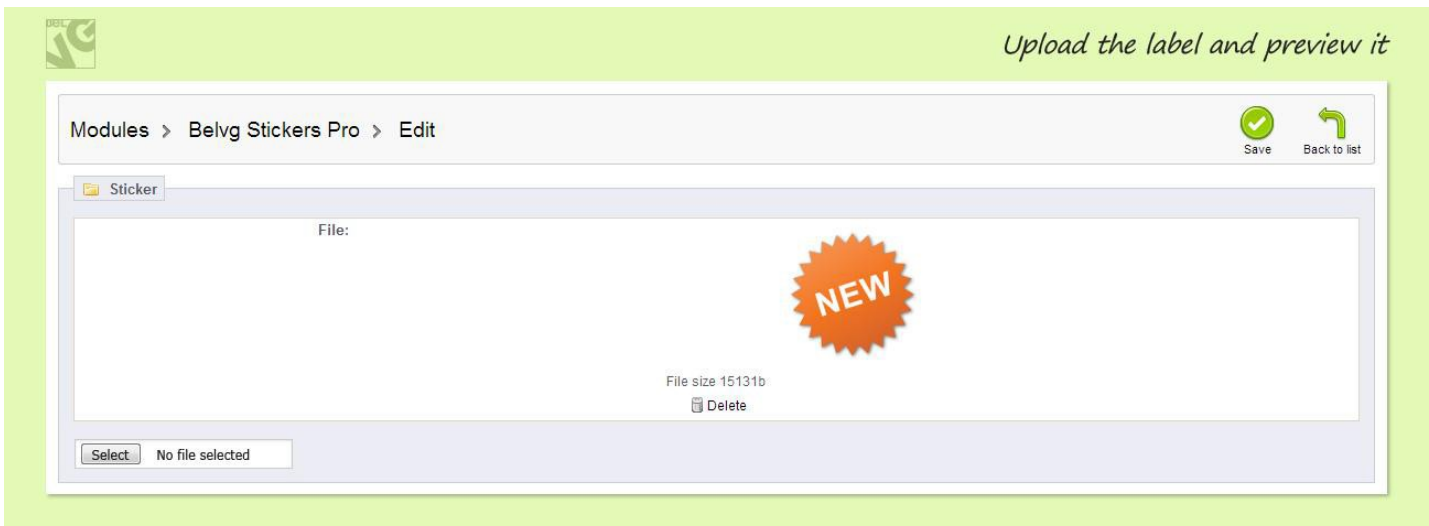

The screenshot shows the 'Manage stickers' interface. At the top right, it says 'Manage stickers'. Below the breadcrumb 'Modules > Belvg Stickers Pro', there is an 'Add new' button with a green plus icon. The interface displays a table with 5 results. The table has columns for 'ID', 'Photo', 'Sticker', and 'Actions'. The data rows are as follows:

ID	Photo	Sticker	Actions
1		hot	 
2		New	 
3		Hot-hot-hot	 
4		Hat	 
5		Youtube	 

At the bottom left, there is a 'Delete selected' button. The interface also shows 'Page 1 / 1 | Display 50 / 5 result(s)' and 'Reset' and 'Filter' buttons.

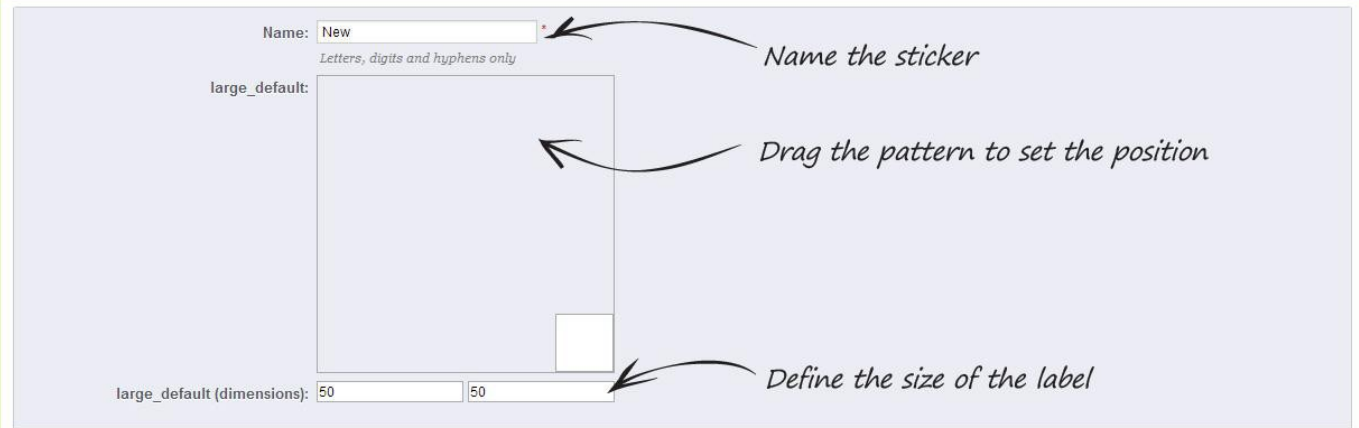

Click Add new to configure a new sticker.

The screenshot shows the 'Upload the label and preview it' interface. At the top right, it says 'Upload the label and preview it'. Below the breadcrumb 'Modules > Belvg Stickers Pro > Edit', there are 'Save' and 'Back to list' buttons. The interface displays a large preview area for the sticker. The preview shows a white background with a red 'NEW' sticker in the center. Below the preview, it says 'File size 15131b' and 'Delete'. At the bottom left, there is a 'Select' button and 'No file selected' text.

Select and upload the picture.

Next, configure it:

The screenshot shows a configuration form for a sticker. It includes a 'Name' field with the value 'New', a note 'Letters, digits and hyphens only', and a 'large\_default' label. Below the label is a large square area for dragging the pattern. At the bottom, there are input fields for 'large\_default (dimensions):' with values '50' and '50'. Three handwritten annotations with arrows point to these elements:

- 'Name the sticker' points to the 'Name' field.
- 'Drag the pattern to set the position' points to the large square area.
- 'Define the size of the label' points to the dimension input fields.

Now that your stickers are configured, set the image types you want to have them. Go to Preferences -> Images. You may see a new Stickers column. A tick mark means that stickers are enabled for this image type.
