What is Prestashop Store Locator?

Perfect for retail network owners, Prestashop Store Locator module helps customers find the local store of yours on Google Maps and check if the required item is in stock there. User location can be configured to be detected automatically so that the list of the nearest shops could be displayed. In the product page, the information about stores with this item is available as well.

Key Features

- Store search by user location and products in stock.
- Automatic user location detection.
- Customizable searching radius.
- Hint text in the product search form.
- Closest stores names, addresses, and distances in search results.
- Possibility to upload a CSV file, where specified stores and available items.
- Displaying distance in kilometers/miles.
- Easy connection to Google Maps via API.

How to use Prestashop Store Locator?

Once you want clients to buy products in your offline stores, Prestashop Store Locator module will be a great solution.

The Google Maps based store locator is embedded right into your default product page. It locates all your shops to let users find the nearest one. Customers enter the item name in Search for products field and get the information about stores with this item in stock.

Map locations are being displayed in a user-friendly sliding manner. Store's data contains working hours, address, profile picture.

&" <ck 'hc' ðbghU`''

1. Go to **AcXi `Yg` AcXi `Yg` UbX`GYfj jWg**, upload the module on the server using the **I d`cUX`UAcXi `Y** button.
2. In the dropdown list choose **DfcXi WiDUj Y**, find **GlcY`@WUcf`** on the opened page, click **ðbghU`''**
3. Go to **5 Xj UbWX` DUfUa YhYfg` DYfZ`fa UbW` 8 jgUV`Y` VWY` Y**, click the **7`YUf`Ga Ufmi7 UW` Y** button.
4. Once you finish configuring the module go back to **5 Xj UbWX` DUfUa YhYfg` DYfZ`fa UbW`** and enable cache back.

<ck 'hc' 8 YUWj UhY`

1. Go to **AcXi `Yg` AcXi `Yg` UbX`GYfj jWg**.
2. Switch to the **ðbghU`YX`AcXi `Yg** tab.
3. Select the **GlcY`@WUcf`** module in the list, in dropdown list select the **I b]bghU`** option.
4. Once the module is uninstalled go to **5 Xj UbWX` DUfUa YhYfg` DYfZ`fa UbW`**, click the **7`YUf`Ga Ufmi7 UW` Y** button.

BcHY. The Store Locator module has been developed and tested only on the default Prestashop theme, so the setting descriptions and screenshots provided in this manual may differ from those you may see if using some custom theme.

; YbYfU`GYHj[b[g`

To access module settings log into your admin dashboard and navigate to **Module Manager** **Module Manager** / **Module Manager** switch to the **Installed Modules** **Module Manager** **Module Manager** tab. In the list of installed modules find **Store Locator** and click **Configure**

Default module settings will offer the following options:

- **API Key**: enter an API key of the Google Maps service. This API will be used by your store to detect the location of customers, draw the location of your stores on the map and provide directions to the nearest ones. To get an API key please visit the official [Google Maps APIs](#) section.
- **Default Coordinates**: enter the default coordinates that will be applied to the map if customers' location can not be detected.
- **Store Image**: upload an image file that will be used to mark your stores on the map.
- **Distance Unit**: select to measure the distance either in miles or kilometers.

5`ck`l gYf`5i lc`cWUjcb. If this option is enabled a customer will see a pop-up window asking to allow the store to auto-detect the location of the user. If the customer selects **5`ck`** — the map will load current user's location, otherwise the default location that is specified in the **@J]h XY#@b[]h XY`** section will be applied.

G ck` GrcfYg` 6`cW` cb` h Y` DfcXi Wl DU` Y. choose **M9G`** to show the list of stores and their addresses where the product is in stock. It's also available to open Google Maps and get directions to the store in the new tab / window.

7GJ`-a dcfh here you can upload a csv file with the list of stores and items that are available in stock for each of your stores. This way each product page will give exact information about the stores and the items they have in stock. Secondly, on the **Ci f`GrcfYg`** page it will be possible to search for any item and get the list of stores and their address where this item is available.

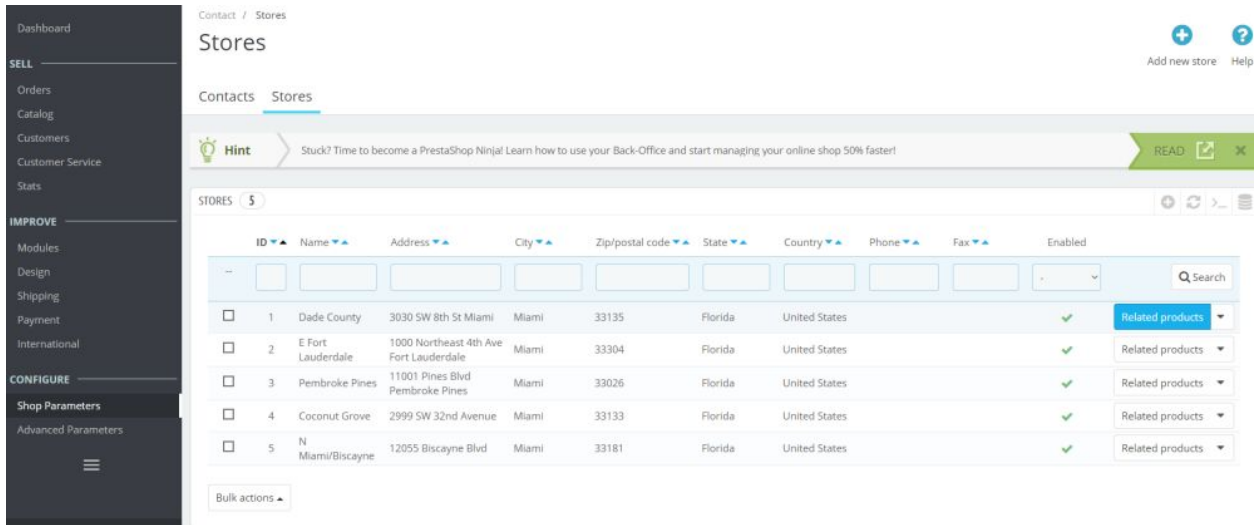

- **8 Y YH` 5` 6 YZcfY`-a dcfh** if you add new records about available items to an existing CSV file, it is better to select **M9G`** to delete all previously imported files to avoid duplicates.

Once finished with the settings, click the **G5 J9`** button to apply the changes.

The screenshot shows the 'Store Locator' configuration interface. At the top, there is a green box labeled 'Enter your Google Maps API Key'. Below it, a text input field contains the API key 'AltxSyB-1Wqmc0scPo8V8TX_pyKASVR-9L4TIQ'. Underneath, there are two input fields for 'Latitude' (25.948969) and 'Longitude' (-80.226439), with a bracketed annotation: 'Set the default coordinates that will be dispalyed as a default user location'. Below these are several settings: 'Image for the Store Locator' with an 'Add file' button and an annotation 'Upload an image for the Store Locator'; 'Distance unit' set to 'km'; 'Allow user autolocation' with 'YES' selected; 'Show stores block on the product page' with 'YES' selected; 'CSV Import' with an 'Add file' button and an annotation 'Upload the file with items and stores data'; 'Delete all before import' with 'NO' selected; and 'Make DB backup before import' with 'YES' selected. A 'Save' button is located at the bottom right of the form.

< c k ' h c ' Y X] h g h c f Y g ' U b X ' U X X f Y g g Y g ' >

The **G h c f Y ' @ W U r c f** module is using default Prestashop menu for store management:
7 c b z [i f Y ' ' G l c d ' D U f U a Y h f g ' ' 7 c b H U W g z switch to the **G h c f Y g** tab.

When the module is enabled you will find a new **F Y U h Y X ' D f c X i W h** option next to each store — this option will list the products that are available in the selected store.

Store Locator

Now let's see how the extension works on the frontend.

When a customer visits your website for the first time a pop-up appears asking the permission to detect the location of the user. If the permission is granted the map will load the user's current location, otherwise, the default coordinates will be displayed.

A user's location is auto-detected or entered manually. It's also possible to set the default location.

Our stores

Enter your location: postal code, city ... and the product if needed to find the nearest distributor ..

Product: Your location: Radius:

1 store found -- see details:

Map data ©2018 Google Terms of Use Report a map error

The search-bar above the map allows searching by product name — the module will mark all stores that have the specified product in stock within the selected radius.

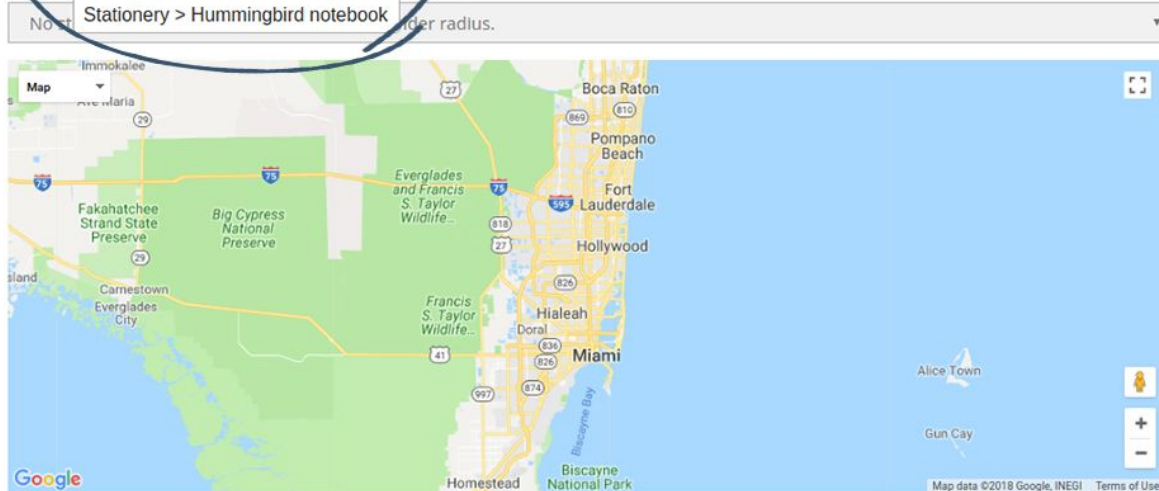

A user can enter a product's name to check its availability in stores. In the search form prompt text is suggested.

Our stores

Enter your location: postal code, city ... and the product if needed to find the nearest distributor ..

Product: Your location: Radius: No

Stationery > Mountain fox notebook
Stationery > Brown bear notebook
Stationery > Hummingbird notebook

Below the map it will list the exact addresses and indicate the distance from the current user's location.

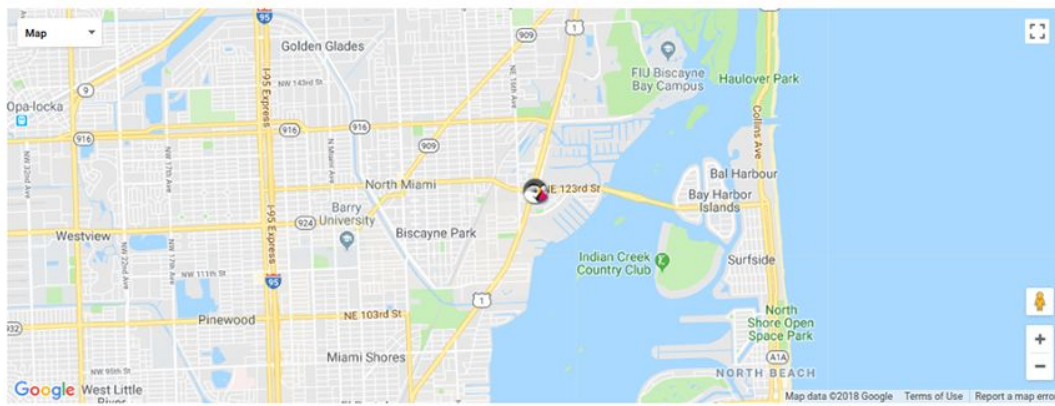

As search results the user gets both a map and a list of stores. Shops with the item are sorted by distance.

Our stores

Enter your location: postal code, city ... and the product if needed to find the nearest distributor ..

Product: Your location: Radius:

1 store found -- see details:

#	Store	Address	Distance
1	Dade County 	3030 SW 8th St Miami Miami, FL 33181	11 km

When changing the radius of the map the extension will automatically load all available shops within the set distance — they will be marked with the image that you have uploaded in the module settings.

Enter your location: postal code, city ... and the product if needed to find the nearest distributor ..

Product: Your location: Radius:

1 store found -- see details:

#	Store	Address	Distance
1	Dade County 	3030 SW 8th St Miami Miami, FL 33181	11 km

Selecting a store will load a pop-up that provides the information about the open hours and the link to get directions to the store via Google Maps.

Each product page will have a new block added with the list the stores where that item is available.

The screenshot shows a product page for a 'MOUNTAIN FOX CUSHION'. The breadcrumb trail is 'Home / Accessories / Home Accessories / Mountain fox cushion'. The product is marked as 'NEW' and priced at €18.90. It includes a 'Color' selector with two options (white and dark grey) and a 'Quantity' selector set to 1. An 'ADD TO CART' button is present. Below the product image is a smaller thumbnail. The page also features social sharing icons and policy links for Security, Delivery, and Return. A description block is visible, detailing the cushion's features. A blue circle highlights the 'Available in stores:' section, which lists three store locations with their addresses and 'Get Directions' links. A blue arrow points from a text box to this section.
