1. Introduction to SwipBox Integration

Prestashop SwipBox Integration module installs a new delivery method which allows customers to pick up their products at SwipBox storage rooms.

Key features:

- Integrate your store with SwipBox service to let your customers pick up their products from any of SwipBox hotspots;
- The list of SwipBox storage rooms are provided on Google map on the checkout page;
- The information about storage rooms that are selected by customers with the exact address is available in the admin panel.

Overall Information

SwipBox is a popular Danish delivery service which includes a wide network of storage rooms across the country where customers can pick up goods that they have purchased through the Internet.

SwipBox module integrates your store with this service, adding a new shipping method to your checkout page.

Customers, who select this method, will see the list of available SwipBox storage locations on Google map, so they will be able to easily find and choose the closest one.

2. How to Install and Deactivate

How to Install

1. Set 777 or 0777 on the folders: **'/modules/'**

Important! Change all permissions back after installation.

2. Go to **Modules** -> **Add a module from my computer** -> choose the file (.zip) -> upload this module. Choose module in section **Front Office Features** and install it.
3. Go to **Advanced Parameters** -> **Performance** -> click the **Clear Smarty Cache** button

How to Deactivate

Click the button **Disable** in **Modules** -> **Front Office Features**.

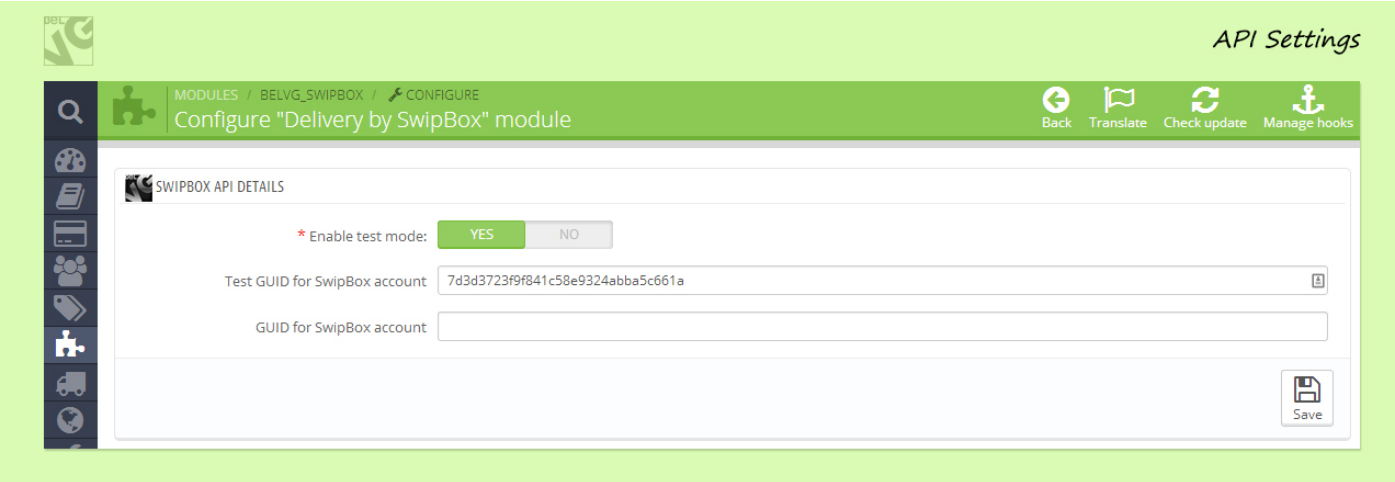

To remove the extension from the server, press **Delete** in **Modules** -> **Front Office Features**.

3. How to Configure

When the module is installed it is necessary to set up basic settings. Log into your admin panel and go to **Modules – Modules – Delivery by SwipBox – Configure**.

The main settings include two sections:

- **SwipBox API details** – in this section you need to enter SwipBox API key which will let you synchronize your store with the service.

The screenshot shows the 'API Settings' page for the 'Delivery by SwipBox' module. The breadcrumb trail is 'MODULES / BELVG_SWIPBOX / CONFIGURE'. The page title is 'Configure "Delivery by SwipBox" module'. The main section is 'SWIPBOX API DETAILS'. It contains a toggle for 'Enable test mode' with 'YES' selected. Below this are two text input fields: 'Test GUID for SwipBox account' (containing '7d3d3723f9f841c58e9324abba5c661a') and 'GUID for SwipBox account' (empty). A 'Save' button is located at the bottom right.

Save

- **Find nearest station** – here you need to enter the address of the point, which will be displayed on Google Map by default. If the customer uses SwipBox service for the first time or has no favorite hotspots he will see points nearest to this address. Otherwise he will see his favorite hotspots first.

| ID | Name | Logo | Delay | Status | Free Shipping | Position | |
|----|----------------------|---|---|-------------------------------------|-------------------------------------|----------------------|-------------------------------------|
| -- | <input type="text"/> | <input type="text"/> | -- | -- | -- | <input type="text"/> | <input type="text"/> |
| 2 | My carrier |  | Delivery next day! | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | + 0 | <input type="button" value="Edit"/> |
| 11 | Pickup at store |  | Pickup at store | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | + 1 | <input type="button" value="Edit"/> |
| 19 | Freight Company |  | Depends on the freight company [1-2 days] | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | + 2 | <input type="button" value="Edit"/> |
| 22 | SwipBox |  | den nye måde at sende og modtage pakker. Kun 3 priser på pakkepost i hele Danmark med track&trace og forsikring | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | + 3 | <input type="button" value="Edit"/> |

SwipBox supports the following parcels dimensions:

SWIPBOX_SMALL

40 x 10 x 60

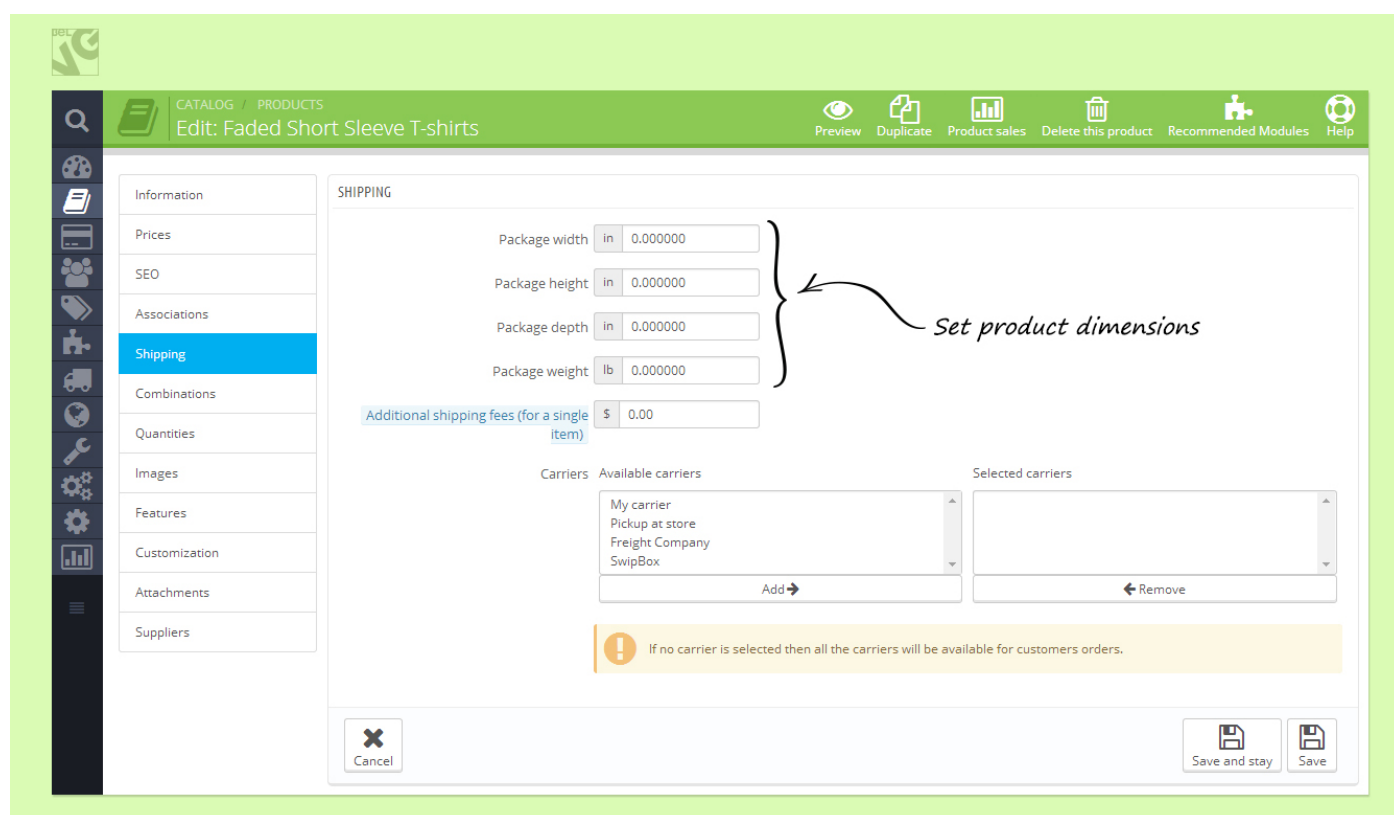

SWIPBOX_MEDIUM

40 x 20 x 60

SWIPBOX_LARGE

40 x 40 x 60

Go to **Product Edit Page - Shipping** to set products' dimensions.

The screenshot shows the 'SHIPPING' tab in the product edit interface. The left sidebar contains a menu with options: Information, Prices, SEO, Associations, Shipping (highlighted), Combinations, Quantities, Images, Features, Customization, Attachments, and Suppliers. The main content area is titled 'SHIPPING' and contains the following fields:

- Package width: in 0.000000
- Package height: in 0.000000
- Package depth: in 0.000000
- Package weight: lb 0.000000
- Additional shipping fees (for a single item): \$ 0.00

A handwritten note with an arrow points to the width, height, and depth fields, stating: *Set product dimensions*.

Below these fields, there is a 'Carriers' section with two columns: 'Available carriers' and 'Selected carriers'. The 'Available carriers' list includes 'My carrier', 'Pickup at store', 'Freight Company', and 'SwipBox'. There is an 'Add →' button between the columns. The 'Selected carriers' column is currently empty and has a '← Remove' button below it.

A yellow warning box at the bottom of the carriers section states: **!** If no carrier is selected then all the carriers will be available for customers orders.

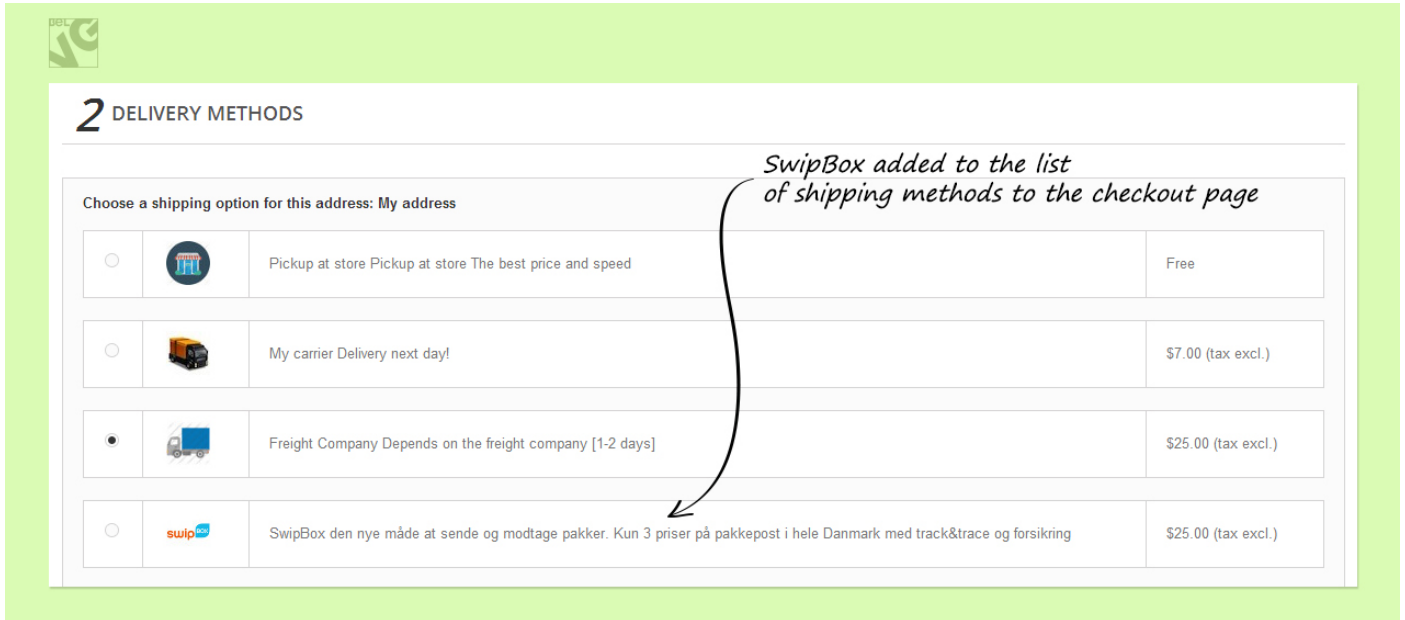

At the bottom of the form, there are three buttons: 'Cancel', 'Save and stay', and 'Save'.

Now the module is ready to work.

4. How to use

Let's see how the extension looks on the frontend.

When the customer goes to the checkout page he will see SwipBox in the list of shipping methods.

When selecting this method customer will see his favorite SwipBox hotspots if he already used this service otherwise hi will see the nearest hotspots to the address indicated in **Find nearest station section**.

Clicking on a hotspot will bring up a pop-up with the exact address.

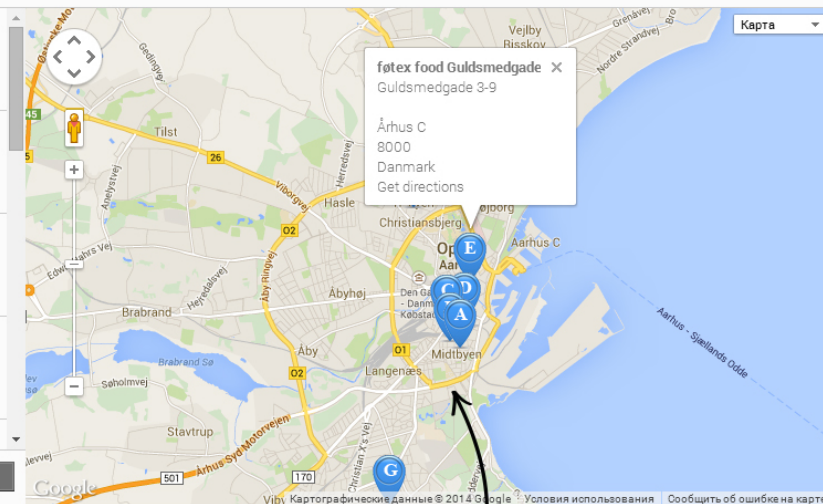

2 DELIVERY METHODS

Choose a shipping option for this address: My address
